SUBJECT INDEX

Absorption data, calculation of M_e from - and concentration dependence of the parameter of polymer–solvent interaction 4, 1004

Acetone, tetrafluoroethylene telomerization in - initiated by ^{60}Co γ-rays and by radical initiators. Soluble telomers 2, 330

Acetyl compounds, investigation of the polycyclocondensation of - 2, 293

Acid chlorides, acylation of serum albumin by unsaturated - 11, 2668

Acid polyamides, the synthesis and study of - based on bis-*ortho*-amino acids and tetracarboxylic anhydrides 1, 85

Acoustic studies of the structural changes on stretching in highly filled polymeric rubber based composites 7, 1572

Acrylamide, study of the effect of tris-(2-carbamoylethyl)amine on the initiation of polymerization of - by persulphate 7, 1719

Acrylic acid, radiation-induced graft polymerization of - to powdered low-pressure polyethylene 8, 2015

Acrylic acid, spectrophotometric titration in the IR region of 2-methyl-5-vinyl pyridine– - copolymers 1, 205

Acrylonitrile, a spectroscopic study of the thermo-oxidative degradation of copolymers of - with N-methylolacrylamide 7, 1597

Acrylonitrile, activation energy for radiation polymerization of - adsorbed on silica gel 2, 300

Acrylonitrile, copolymerization of - with β, β'-dichlorovinyl acetate 1, 22

Acrylonitrile, gradient adsorption thin layer chromatography of statistical styrene– - copolymers 4, 909

Acrylonitrile, hydrodynamic characteristics and light scattering of solutions of a styrene– - copolymer prepared in a precipitant 7, 1734

Acryloyl chloride, the radiation-induced graft polymerization of - to polyethylene and polyethylene terephthalate 2, 406

Activated diesters, synthesis of polyamides based on - of pyridinecarboxylic acids 7, 1677

Activation energy for radiation polymerization of acrylonitrile adsorbed on silica gel 2, 300

Activation energy, temperature coefficient of the - of dipole relaxation and heat expansion of polymers 9, 2277

Activators, use of - of indirect action for controlling the rate of anionic polymerization of dodecalactam 2, 473

Active filler parcicles, relaxational φ-transition in filled polymers and molecular mobility of - 9, 2099

Active media, the time dependence of the strength of polymer glass in a surface - 7, 1628

Acylation of serum albumin by unsaturated acid chlorides 11, 2668

Adhesion, contact oxidation and - to steel of polyethylene coatings 12, 2840

Adsorption, gradient - thin layer chromatography of statistical styrene–acrylonitrile copolymers 4, 909

Adsorption, notes on the theory of - of a single macromolecules 6, 1344

Adsorption, phase transitions on - of macromolecules 9, 2088
Adsorption, the theory of - and its relation to chromatographic separation of oligomers on porous adsorbents according to molecular masses and types of functionality 3, 578
Adsorption-active medium, features of the development of forced elastic deformation during the stretching of glasslike polyethyleneterepthalate in an - 10, 2464
Adsorption-active media, reasons for lowering of mechanical properties of polymers during deformation in - 11, 2706
Alcohols, aspects of the cationic polymerization of ε-caprolactone in the presence of - 2, 306
Aliphatic amines, the mechanism of thermal degradation of low molecular weight compounds modelling the structure of network polymers based on diepoxides and aromatic and - 3, 647
Aliphatic amines, thermal breakdown mechanism of crosslinked polymers based on diepoxides and aromatic and - 11, 2793
Aliphatic-aromatic block copolyesters, the synthesis and properties of - 1, 158
Aliphatic ionene polycation structure, on amomalies in the dependence of the electrical conductivity of polymeric ion-radical salts of 7,7,8,8-tetracyanoquinodimethane on - 4, 894
Alkyl alumoxane complex catalysts, infrared analysis of the conditions of synthesis of - influencing their activity in the copolymerization of epoxides 7, 1688
n-Alkylene glycols, study of the kinetics and thermodynamics of thermal breakdown of reticular polymers of dimethacrylic esters of - 10, 2378
Allylpyridazones, kinetics of radiation polymerization of - 2, 286
Aluminium γ-oxide, effect of the structure of phenolformaldehyde oligomers on their interaction with - 7, 1762
Aluminium soaps, kinepectic reinforcement and relaxation of coordination-polymer gels of - 7, 1709
Amine, the role of proton-donors in cyclomerization of isocyanates by the action of an - –epoxide catalytic system 11, 2768
Amines, conversions of the reactive polymerization centres in glycidyl ethers by tertiary - 2, 335
Amines, effect of cyclization on the topological structure and properties of polymeric networks based on diglycidyl ethers and aromatic - 8, 1873
Amines, infrared investigation of the structure of urea-formaldehyde oligomers synthesized in the presence of - 8, 1974
Amorphized cellulose, the crystallization of - 6, 1382
Amorphous parts, the free induction signal from - of partially crystalline polymers 12, 2971
Amorphous polymers, multiplicity of the temperature dependence of the enthalpy of - in the vicinity of glass transition temperature 12, 2953
Ampholytes, study of complex-formation on copper (II) with - containing nitrogen-phosphorus 3, 678
Anilinephthalein, study of the structure of solutions and gels of polypyromellitimide and polyterephthalamide of - in dimethylformamide 6, 1457
Anionic non-equilibrium copolymerization of hexamethyl cyclotrisiloxane with *cis* and *trans*-isomers of 1,3,5-trimethyl-1,3,5-triphenyl cyclotrisiloxane 1, 27
Anionic polymerization, use of activators in indirect action for controlling the rate of - of dodecalactam 2, 473
Anisotropic light scattering with the persistent chain model 2, 314
Anisotropy, conformation and optical - of comb-like macromolecules with mesogenic side groups 10, 2340

Anisotropy of wetting and the molecular orientation capacity of elastomers under deformation 8, 1944
Annealing, effect of low molecular weight fractions and side branches in the main chain of the macromolecules on the recrystallization process during pressure - of polyethylene 10, 2385
Annealing, polymorphism and structural transformations of polycaproamide during - 1, 49
Anthracene-containing polymers, intrachain luminescence quenching in solutions of - based on polymethyl methacrylate 7, 1578
Antioxidants, sterically hindered phenols— - for polyolefines. Relation of antioxidative activity to structure. Review 9, 2063
Anti-ozonants, the mechanism of the protective action of - 6, 1397
Aqueous-organic media, reactivity of aromatic oligoamine and oligochlorides on polycondensation in - 3, 673
Aqueous solutions, high resolution NMR analysis of conformation transitions in - of gelatin 9, 2182
π-Arenemetaltricarbonyl complexes, oligomer and polymer - 6, 1480
Aromatic and aliphatic amines, the mechanism of thermal degradation of low molecular weight compounds modelling the structure of network polymers based on diepoxides and - 3, 647
Aromatic and aliphatic amines, thermal breakdown mechanism of crosslinked polymers based on diepoxides and - 11, 2793
Aromatic amines, effect of cyclization on the topological structure and properties of polymeric networks based on diglycidyl ethers and - 8, 1873
Aromatic glycols, study of the reactions of formation and destruction of condensation telomers of bisecondary - and carboxylic acids 12, 2831
Aromatic oligoamines, reactivity of - and oligochlorides on polycondensation in aqueous-organic media 3, 673
Aromatic polyamide hydrazide, electrical birefringence of solutions of - in dimethyl sulphoxide 4, 978
Aromatic polyamide solutions, structural features of - in sulphuric acid 6, 1388
Aromatic polyamides, the hydrogen bond and its effect on spontaneous orientation during the heating of - 5, 1109
Aromatic polyamides, thermal degradation of compositions based on - 8, 1953
Atactic polystyrene, rheological properties of melts of polyoxymethylene— - blends 11, 2614
Auto-acceleration, relation of - in radical polymerization of methyl methacrylate in bulk with structural changes of the polymerizing system 10, 2547
Auto-oxidation, on features of the oligomerization of hydroquinone under - 10, 2434
2,6-di-(4′-azidobenzal)cyclohexanone, photo-oxidation of - in polystyrene films 8, 1845
4-azo-bis-4-cyanpentanoic acid, chemical modification of calcium carbonate surface by - and its effect on initiation and polymerization 4, 808

Bacterial infection, the degradation of polyethylene terephthalate in the presence of - 7, 1604
***p*-Benzoquinone,** thermal polymerization of - in the presence of polycaproamide 3, 641
Benzoyl peroxide, mechanism of reactions initiated by thermal decomposition of - in polyamide 12, 2991

Benzoyl peroxide, nature of the breakdown of mechanically loaded triacetylcellulose initiated by - 5, 1176
Benzoyl peroxide, study of the reaction of polyamic acid with - at room temperature 4, 782
Binary solvent mixtures, diffusion, sorption and permeability of - in polyethylene 8, 1865
Birefringence, electrical - of solutions of aromatic polyamide hydrazide in dimethyl sulphoxide 4, 978
Birefringence of polymethylmethacrylate in a sinusoidal mechanical field 6, 1306
Birefringence of swollen non-gaussian polymeric networks 8, 1889
Bis-*ortho*-amino acids, the synthesis and study of acid polyamides based on - and tetracarboxylic anhydrides 1, 85
Bis-phenols, inhibiting action of - on oxidation of polypropylene containing hydroperoxide groups 4, 938
α,ω-bis-(tetramethylammonium) oligodimethylsiloxane, polymerization of hexamethylcyclotrisiloxane by - in the presence of trimethylsilanol 8, 1998
Blends, disperse structure and mechanical properties of extruded polypropylene–polystyrene - 8, 1825
Blends, morphology of extruded polypropylene–polystyrene - 8, 1811
Block copolymer, the effect of the composition of poly(arylate–butadiene) - on the temperature-time characteristics of its thermal degradation 5, 1067
Block copolymer mixtures, the crystallization kinetics of - and multiple blocks of polyoxyethylene and polyarylate 5, 1116
Block copolymer solutions, molecular mobility in ternary - 4, 873
Block copolymers, features of strain-strength properties of butadiene–styrene - under uniaxial stretching 1, 90
Block copolymers, study of - by gel-permeation chromatography 6, 1512
Block copolymers, the synthesis and properties of halogen-containing polyarylate-sulphone - 12, 2941
Block copolymers, thermodynamics of the compatibility of blocks in - 10, 2331
Branched diane epoxide oligomers, study of the formation of - at advanced stages of synthesis 8, 1979
Branching centres, distribution of - along macromolecules in branched radical polymerization 2, 445
Branching centres, molecular weight distribution and distribution of - along macromolecules during radical polymerization of vinyl monomers with the formation of unsaturated end groups 7, 1767
Breakdown, nature of the - of mechanically loaded triacetylcellulose initiated by benzoyl peroxide 5, 1176
Butadiene, a chromatographic study of the oligomerization of - 7, 1636
Butadiene, effect of the physico-mechanical properties of methylmethacrylate, - and styrene copolymers on the impact strength of their compositions with polyvinylchloride 4, 824
Butadiene, features of strain-strength properties of - –styrene block copolymers under uniaxial stretching 1, 90
Butadiene, main regularities of polymerization of - by the action of a composite sodium–aluminium organic initiator in hydrocarbon medium 7, 1742
Butadiene, polymerization of - under action of sodium organic initiators in slightly polar media 2, 388
Butadiene elastomer, influence of holding time on the process of molecular ordering in a - 8, 1802

^{13}C NMR, study of the synthesis of polyarylene sulphonoxides based on phenolphthalein and dichlorodiphenylsulphone by - 5, 1218
^{13}C NMR method, study of polyether thermoelastoplastics by the ^{1}H and - 9, 2149
^{13}C NMR spectra, relation between chemical shift values in ^{1}H and - of vinyl monomers and some parameters of their reactivity in radical polymerization and copolymerization 9, 2252
^{13}C NMR spectra, structure of 1-methylcyclooctadiene polymer as judged by the - 4, 775
^{13}C NMR study, a - of structural isomers and compositional sequences in oligoesters based on propylene oxide and maleic anhydride 3, 549
Caking, microscopic study of the structure and decomposition of fluoroplast films produced from powder by - and condensation under vacuum 4, 861
Calcium carbonate surface, chemical modification of - by 4-azo-bis-4-cyanpentanoic acid and its effect on initiation and polymerization 4, 808
Calibration, combination of a gel-chromatograph with an automatic viscometer. - according to molecular weight of the polymer correcting for instrumental broadening 9, 2295
Calorimetric study, a - of changes in crystalline polymers and their blends under the simultaneous action of high pressures and shear strains 5, 1073
Calorimetric study of ethylene oxalate, polyethylene oxalate and parameters of the polymerization of ethylene oxalate in the range 8–450 K 7, 1695
Calorimetric study, the - in the 13·8–340°K range of δ-valerolactone, its polymer, and of the δ-valerolactone polymerization 3, 628
Caprolactam, equilibrium in the system polycaproamide– - –water below the melting point of the polymer 6, 1319
Caprolactam polymerization, mathematical modelling of - 5, 1091
ε-Caprolactone, aspects of the cationic polymerization of - in the presence of alcohols 2, 306
Capsulation of solids, study of the formation of polymer coatings by - by radiation-induced polymerization of monomers from the vapour phase 3, 696
Carbon black, study of the kinetics of inhibition of thermo-oxidation of polyethylene by - 6, 1462
***m*-Carborane,** synthesis and study of heterogeneous polyamides containing - 11, 2788
Carborane-containing polyheteroarylenes, electrophysical properties and molecular mobility of - 10, 2537
***o,o′*-Carbo-tert-butylperoxysuccinyl peroxide,** the study of kinetic features of the radical polymerization of styrene, initiated by - 1, 98
Carboxyl cation-exchange resin, structure and sorption properties of macroporous KM-2p - 5, 1205
Carboxyl-containing celluloses, IR-spectroscopic study of hydration of the - and polyacrylic acid 6, 1279
Carboxyl cationites, influence of the porosity of - of Solose K on the diffusion and kinetics of H_2O sorption 10, 2452
Carboxylic acids, interaction of polyglycidyl methacrylate with - 12, 3030
Carboxylic acids, study of the reactions of formation and destruction of condensation telomers of bisecondary aromatic glycols and - 12, 2831
Catalyst, effect of oxygen on the activity of a supported vanadium - during gas phase polymerization of ethylene 10, 2392
Catalysts, infrared analysis of the conditions of synthesis of alkyl alumoxane complex - influencing their activity in the copolymerization of epoxides 7, 1688

Catalysts, investigation of the mechanism of polypentanamer degradation in the presence of metathesis - 1, 164
Catalysts, structure of active polymerization centres of dienes on Ziegler–Natta - 7, 1542
Catalysts, study of the alternating copolymerization of isoprene and propylene using compounds of titanium and vanadium as - 10, 2457
Catalysts, study of the interaction of components of heterogeneous Ziegler–Natta -, using the Monte Carlo method 12, 2985
Catalytic activity, complex of Rh(III) and polyethyleneimine and their - in hydrogenation of cyclohexene 7, 1775
Catalytic system, on the influence of secondary low molecular weight products on the polymerization rate of propylene by the $TiCl_3$-based - 2, 412
Catalytic system, the role of proton-donors in cyclotrimerization of isocyanates by the action of an amine-epoxide 11, 2768
Cationic graft polymerization, radiation-induced low-temperature - of vinyl-n-butyl ether to polyvinyl chloride in the glass transition 2, 440
Cationic polymerization, aspects of the - of ε-caprolactone in the presence of alcohols 2, 306
Cellulose, the crystallization of amorphized - 6, 1382
Cellulose acetate plastics, spontanous elongation of - 3, 565
Cellulose acetates, influence of the nature of the solvent on the processes of structuring in solutions of - 11, 2598
Cellulose acetates, IR spectroscopic study of hydration of - and polyvinyl acetate 11, 2778
Cellulose acetates, preparation and study of properties of primary low-substituted soluble - 6, 1495
Cellulose derivatives, new phosphorus containing - 9, 2115
Cellulose dinitrate solutions, the hydrodynamic and dynamooptical properties of - 2, 358
Cellulose ether, distribution of electrolytes and phase equilibria in a - –water–electrolyte system 3, 704
Cellulose hydrate fibres, supermolecular structure of graft copolymers of cotton and - with certain fluorine-containing polymers 4, 800
Celluloses, IR-spectroscopic study of hydration of the carboxyl-containing - and polyacrylic acid 6, 1279
Chain propagation, mechanism of - and termination in polymerization-exchange reactions of synthesis of polydimethylsilazasiloxanes 8, 2005
Chain-transfer reaction, features of the - of group IV B organo-metal compounds 5, 1127
Chalk, polymerization of vinyl monomers on the surface of - activated by dicarboxyl-containing peroxide 8, 1883
Chemical conversions, refractometric method of analysis of - of macromolecules in solution 11, 2813
Chemical imidization, investigation of the kinetics of - 4, 791
Chemical modification of calcium carbonate surface by 4-azo-bis-4-cyanpentanoic acid and its effect on initiation and polymerization 4, 808
Chemical reactions, determination of the molecular weight distribution of high pressure polyethylene and calculation of the rate constants of the main - 6, 1367
Chemical shift values, reaction between - in ^1H and ^{13}C NMR spectra of vinyl monomers and some parameters of their reactivity in radical polymerization and copolymerization 9, 2252
Chemical structure, effect of - of two-component melts of heteropolymers on the formation of domain structure 9, 2232

Chemical structure, influence of the - of polyarylene sulphides on properties of the filled polymers **8, 1934**
Chemical structure of polyphenylene-1,3,4-oxadiazole and fibres based on them **1, 41**
Chlorinated derivatives, conformational and optical properties of molecules of ladder type polyphenylsiloxane and its - **10, 2405**
***m*-Chlorophenylisocyanate,** kinetics of interaction of - with hydroxyl end groups of oligobutadienes **4, 964**
Cholesterol, effect of the hydrogen bond on the intermolecular organization of polymers containing - **5, 1248**
Chromatographic separation, the theory of adsorption and its relation to - of oligomers on porous adsorbents according to molecular masses and types of functionality **3, 578**
Chromatographic study, a - of the oligomerization of butadiene **7, 1636**
Chromatography, determining coefficients K_s and a for oligomers using liquid - **3, 728**
Chromatography, determining the proportion of mono-functional components in oligoesters by thin-layer - **9, 2290**
Chromatography, gel-permeation - of epichlorohydrin oligomers **10, 2520**
Chromatography, gradient adsorption thin layer - of statistical styrene–acrylonitrile copolymers **4, 909**
Chromatography, molecular weight analysis of oligomers using highly efficient exclusion liquid - **8, 2024**
Chromatography, possibilities of gel-penetration - as an absolute method of determining the parameters of the molecular weight distribution of polymethylmethacrylates **10, 2400**
Chromatography, study yf block copolymers by gel-permation - **6, 1512**
Chromatography, synthesis of porous reticular copolymers of divinyl ethers of hydroquinone and diethylene glycol and their testing as sorbents in liquid - **7, 1563**
***Cis*-1,4-polyisoprene,** mechanism of degradation of - in conditions of inhibited oxidation **12, 2859**
***Cis* and *trans*-isomers,** anionic non-equilibrium copolymerization of hexamethyl cyclotrisiloxane with - of 1,3,5-trimethyl-1,3,5-triphenyl cyclotrisiloxane **1, 27**
^{60}Co γ-rays, tetrafluoroethylene telomerization in acetone initiated by - and by radical initiators. Soluble telomers **2, 330**
Co-cyclotrimerization of 2,4-toluylene diisocyanate and phenyl isocyanate **11, 2700**
Comb-like macromolecules, conformation and optical anisotropy of - with mesogenic side groups **10, 2340**
Comb-like polymers, electro-optical properties of - with a different distance of the mesogenic side group from the main chain **11, 2606**
Comb-like polymers, intramolecular structuring in solutions of - **1, 1**
Comb-like polymers, special aspects of the photochromism of indolinospiropyranes in - **11, 2635**
Combustion, features of - of polymethyl methacrylate compositions with some phosphoric acid esters **4, 971**
Compatibility, thermodynamics of the - of blocks in block copolymers **10, 2331**
Complex formation between polymethacrylic acid and polyacrylamide **7, 1683**
Complex-formation, study of - on copper (II) with ampholytes containing nitrogen-phosphorus **3, 678**
Complex-radical mechanism, calculation of the distribution of units and composition heterogeneity of copolymers obtained by a - **3, 709**
Complex-radical mechanism, configuration statistics of copolymers obtained by a - **3, 720**

Composition heterogeneity, calculation of the distribution of units and - of copolymers obtained by a complex-radical mechanism 3, 709
Computer modelling of the thermodynamic properties of polymer solutions of varied concentration 12, 2873
Computer simulation, the - of slowing-down cooperative reactions 3, 620
Condensation, microscope study of the structure and decomposition of fluoroplast films produced from powder by caking and - under vacuum 4, 861
Conductivity, features of radiation-induced electrical - of some polar polymers 7, 1754
Conformation and optical anisotropy of comb-like macromolecules with mesogenic side groups 10, 2340
Conformation transitions, high resolution NMR analysis of - in aqueous solutions of gelatin 9, 2182
Conformation transitions in polyethylene terephthalate on crystallization by the action of a liquid medium 2, 468
Conformational and optical properties of molecules of ladder type polyphenylsiloxane and its chlorinated derivatives 10, 2405
Conformational properties, hydrodynamic and - of molecules of the poly-*p*-methacryloyl oxybenzoic ether of *p*-n-nonyloxyphenol 7, 1671
Conjugation system, effect of high pressure on certain electrophysical properties of iodine-doped polymers with a - 11, 2641
Coordination-polymer gels, kinepectic reinforcement and relaxation of - of aluminium soaps 7, 1709
Copolyesters, the synthesis and properties of aliphatic-aromatic block - 1, 158
Copolymer, hydrodynamic characteristics and light scattering by solutions of a styrene–acrylonitrile - prepared in a precipitant 7, 1734
Copolymer, influence of the concentration of the crosslinking agent on the mechanical properties of ionite membranes based on a fluoroplastic and the - of 2,5-methylvinylpyridine and divinylbenzene 11, 2718
Copolymer, investigation of the mesomorphic properties of solutions of an isoprene–α-methylstyrene–isoprene triblock - 6, 1327
Copolymer, study of the structure and deformation properties of films from compositions of a fluoropolymer and - of 2,5-methylvinylpyridine and divinylbenzene 4, 915
Copolymer, the effect of the composition of poly(arylate–butadiene) block - on the temperature-time characteristics of its thermal degradation 5, 1067
Copolymer, viscoelastic properties of plastisols based on the - of methyl methacrylate and methacrylic acid during their transition to plastigels 12, 2947
Copolymer chains, matrix synthesis of - with definite alternation of monomer units 8, 1909
Copolymer mixtures, the crystallization kinetics of block - and multiple blocks of polyoxyethylene and polyarylate 5, 1116
Copolymer solutions, molecular mobility in ternary block - 4, 873
Copolymer synthesis, aspects of - by heterophase polycondensation 2, 350
Copolymerization, anionic non-equilibrium - of hexamethyl cyclotrisiloxane with *cis* and *trans*-isomers of 1,3,5-trimethyl-1,3,5-triphenyl cyclotrisiloxane 1, 27
Copolymerization of acrylonitrile with β, β′-dichlorovinyl acetate 1, 22
Copolymerization of 3,4-epoxyhexahydrobenzyl acrylate with vinyl monomers 4, 867
Copolymerization, infrared analysis of the conditions of synthesis of alkyl aluminoxane complex catalysts influencing their activity in the - of epoxides 7, 1688
Copolymerization, relation between chamical shift values in ^{1}H and ^{13}C NMR spectra of vinyl monomers and some parameters of their reactivity in radical polymerization and - 9, 2252

Copolymerization, study of the alternating - of isoprene and propylene using complex compounds of titanium and vanadium as catalysts **10, 2457**
Copolymerization, the part played by donor-acceptor complexes in the photo- or electro-initiated isoprene - with mono-maleates **3, 637**
Copolymerization, the radical - of α-substituted vinyl phosphonates **3, 667**
Copolymers, a spectroscopic study of the thermo-oxidative degradation of - of acrylonitrile with N-methylolacrylamide **7, 1597**
Copolymers, analysis of the content and distribution of the double bonds for vinyl chloride homo- and - with a different molecular mass distribution **5, 1047**
Copolymers, calculation of the distribution of units and composition heterogeneity of - obtained by a complex-radical mechanism **3, 709**
Copolymers, configuration statistics of - obtained by a complex-radical mechanism **3, 720**
Copolymers, effect of adjacent units during thermal degradation of - of vinyl chloride with vinyl acetate **6, 1299**
Copolymers, effect of polymer structure and the nature and concentration of the plasticizer on the formation of defects in plasticized polyvinylchloride and vinylchloride - **4, 816**
Copolymers, effect of the physico-mechanical properties of methylmethacrylate, butadiene and styrene - on the impact strength of their compositions with polyvinylchloride **4, 824**
Copolymers, gradient adsorption thin layer chromatography of statistical styrene–acrylonitrile - **4, 909**
Copolymers, heat of wetting and porous structure of network - **12, 2903**
Copolymers, rheological properties of ethylene–propylene - at small shear stresses **6, 1488**
Copolymers, spectrophotometric titration in the IR region of 2-methyl-5-vinyl pyridine–acrylic acid - **1, 205**
Copolymers, study of block - by gel-permeation chromatography **6, 1512**
Copolymers, supermolecular structure of graft - of cotton and cellulose hydrate fibres with certain fluorine-containing polymers **4, 800**
Copolymers, synthesis of porous reticular - of divinyl ethers of hydroquinone and diethylene glycol and their testing as sorbents in liquid chromatography **7, 1563**
Copolymers, the phase condition and viscous properties of sulphuric acid solutions of polymers and - based on *p*-phenylene amides **5, 1085**
Copolymers, the synthesis and properties of halogen-containing polyarylate-sulphone block - **12, 2941**
Copolymers, the synthesis of graft - of polycaproamide with polydimethylaminoethyl methacrylate, using a reversible redox system **11, 2663**
Copolymers, thermodynamics of the compatibility of blocks in block - **10, 2331**
Copper, study of complex-formation on - (II) with ampholytes containing nitrogen-phosphorus **3, 678**
Cotton and cellulose hydrate fibres, supermolecular structure of graft copolymers of - with certain fluorine-containing polymers **4, 800**
Crosslinking, the effect of - in polymethyl methacrylate on the parameters and mechanism of diffusional transfer **2, 345**
Crosslinked polymers, thermal breakdown mechanism of - based on diepoxides and aromatic and aliphatic amines **11, 2793**
Crosslinking, effect of conjugated dienes on - of polyvinylchloride **11, 2808**
Crosslinking agent, influence of the concentration of the - on the mechanical properties of ionite membrane based on a fluoroplastic and the copolymer of 2,5-methylvinylpyridine and divinylbenzene **11, 2718**

Cryolysis, regulation of the structure of rigid polymers in the process of - 3, 570
Crystalline lattices, temperature dependence of expansion of - of some flexible chain polymers 8, 1837
Crystalline phase, the decay of peroxide macroradicals in the - of isotactic polypropylene 6, 1402
Crystalline polyethylene, study of the structure and molecular mobility of - by the methods of photo-elasticity and torsion pendulum 7, 1551
Crystalline polymers, a calorimetric study of changes in - and their blends under the simultanous action of high pressures and shear strains 5, 1073
Crystalline polymers, the free induction signal from amorphous parts of partially - 12, 2971
Crystalline polyolefines, the influence of liquid plasticizing media on the deformation of - 8, 1927
Crystallinity, determination of the degree of - of elastomers under stretching 1, 59
Crystallinity, the effects of orientation and - on the resistance of polyethylene terephthalate to photo-oxidation 5, 1138
Crystallization, conformation transitions in polyethylene terephthalate on - by the action of a liquid medium 2, 468
Crystallization, NMR analysis of the - of oligoesters and urethane rubbers 5, 1170
Crystallization, the - of amorphized cellulose 6, 1382
Crystallization kinetics, the - of block copolymer mixtures and multiple blocks of polyoxyethylene and polyarylate 5, 1116
Crystallizing and non-crystallizing elastomers, relaxation processes in - 1, 67
Crystallizing plasticizers, thermo-optical method of determining temperatures of physical transitions in - 11, 2826
Crystallosolvates, polymer - . Review 2, 236
Cu^{2+} complex formation, the effect of pH on - with poly-4-vinylpyridine 9, 2143
Cyclization, consideration of - in the theory of equilibrium branched polycondensation 10, 2477
Cyclization, effect of - on the topological structure and properties of polymeric networks based on diglycidyl ethers and aromatic amines 8, 1873
Cyclization reactions, calculation of gel points taking account of - 10, 2489
Cyclodehydration, mass spectrometric thermal analysis of the - of polyamic acids 12, 2922
Cyclohexene, complex of Rh(III) and polyethyleneimine and their catalytic activity in hydrogenation of - 7, 1775
Cyclopentadiene, the solid-phase polymerization of - in the presence of titanium tetrachloride 12, 2977
Cyclotrimerization, the role of proton-donors in - of isocyanates by the action of an amine-epoxide catalytic system 11, 2768

Decay, kinetics and mechanism of - of peroxide radicals in oxidation of solid polypropylene 1, 217
Decay, study of the shape of - of NMR free induction in polyurethanes 8, 1967
Decomposition, microscope study of the structure and - of fluoroplast films produced from powder by caking and condensation under vacuum 4, 861
Deformability of polyvinyl chloride in creep conditions 6, 1261
Deformation, action of ozone on isotropic and oriented blends of polypropylene and polyethylene. On the influence of - on the rate of oxidation 11, 2754

Deformation, anisotropy of wetting and the molecular orientation capacity of elastomers under - **8, 1944**
Deformation, features of the development of forced elastic - during the stretching of glasslike polyethyleneterephthalate in an adsorption-active medium **10, 2464**
Deformation, features of the kinetics of - of oriented polyethylne **5, 1212**
Deformation, method of determining the linear rate of propagation of microcracks by plotting distribution curves during - of polymers in liquid media **8, 2040**
Deformation, reasons for lowering of mechanical properties of polymers during - in adsorption-active media **11, 2706**
Deformation, special features of elastic - of uniaxially oriented high-density polyethylene **11, 2760**
Deformation, structurization of low molecular weight inorganic compounds introduced into polymers during their - in liquid media **6, 1430**
Deformation, study of the structure and - properties of films from compositions of a fluoropolymer and copolymer by 2,5-methylvinylpyridine and divinylbenzene **4, 915**
Deformation, the influence of liquid plasticizing media on the - of crystalline polyolefines **8, 1927**
Deformation rates, the mechanical behaviour of polyvinyl chloride and of PVC blended with rubber modifier over a wide range of - **10, 2472**
Degradation, concerning the - of polyoxyethylene fragments of oxyethylated compounds during complex-formation with transition metal compounds **6, 1351**
Degradation, effect of adjacent units druing thermal - of copolymers of vinyl chloride with vinyl acetate **6, 1299**
Degradation, mechanism of - of *cis*-1,4-polyisoprene in conditions of inhibited oxidation **12, 2859**
Degradation, study of the mechanism of the synergistic action of mixtures of zinc salts of organic acids and polyols during thermal - of polyvinyl chloride **12, 2849**
Degradation, the - of polyethylene terephthalate in the presence of bacterial infection **7, 1604**
Degradation, thermal - of poly(arylate-arylene sulphonoxides) **11, 2654**
Dehydrochlorination, kinetics of the - of polyvinylchloride in a closed system in the presence of HCl acceptors **9, 2195**
Dense-network epoxy polymers, on the nature of segmental mobility of - **11, 2732**
Depolarizer ions, polarographic analysis of kinetics of synthesis of polyelectrolytes by combination of - with macromolecules **3, 732**
Diane epoxide oligomers, study of the formation of branched - at advanced stages of synthesis **8, 1979**
Dibutylphthalate, NMR relaxation and the state of solvent molecules in solutions of polyvinylchloride and polystyrene in - **12, 3024**
Dicarboxyl-containing poroxide, polymerization of vinyl monomers on the surface of chalk activated by - **8, 1883**
3,4-Dichloro-1,3-butadiene-2-phosphonate polymers, the synthesis, structure and properties of - **6, 1414**
Dichlorodiphenylsulphone, ^{1}H and ^{13}C NMR analysis of the synthesis of polyarylene sulphonoxides based on diphenylolpropane and - **5, 1183**
Dichlorodiphenylsulphone, study of the synthesis of polyarylene sulphonoxides based on phenolphthalein and - by ^{13}C NMR **5, 1218**
1,2-Dichloroethane, polymerization mechanism of styrene by the action of tin(IV) chloride in - **9, 2272**

β, β′-Dichlorovinyl acetate, copolymerization of acrylonitrile with - 1, 22
Dielectric and nuclear magnetic relaxation in latex polymers in relation to their morphological properties 5, 1159
Dielectric relaxation in polydialkoxyphosphazenes 6, 1443
Dielectric relaxation in poly-N-*n*-octadecylmethacrylamide 8, 1902
Dielectric relaxation, study of - in polymer semi-interpenetrating networks based on toluylene diisocyanate and propylene sulphide 10, 2369
Dienes, effect of conjugated - on crosslinking of polyvinylchloride 11, 2808
Dienes, stabilization of polyvinyl chloride by conjugated - 4, 854
Dienes, structure of active polymerization centres of - on Ziegler–Natta catalysts 7, 1542
Diepoxides, the mechanism of thermal degradation of low molecular weight compounds modelling the structure of network polymers based on - and aromatic and aliphatic amines 3, 647
Diepoxides, thermal breakdown mechanism of crosslinked polymers based on - and aromatic and aliphatic amines 11, 2793
Diesters, synthesis of polyamides based on activated - of pyridinecarboxylic acids 7, 1677
Diethylene glycol, synthesis of porous reticular copolymers of divinyl ethers of hydroquinone and - and their testing as sorbents in liquid chromatography 7, 1563
Diethylene glycol adipate solutions, intrinsic viscosity of - of various functionalities 5, 1144
Diffraction study of the structure of ion exchange fibres from polypropylene modified by grafted polystyrene 8, 1797
Diffusion, coefficients of translational and rotational - of low-molecular compounds in polymers with various glass transition temperatures 3, 592
Diffusion, influence of the porosity of carboxyl carbonites of Solose K on the - and kinetics of H_2O sorption 10, 2452
Diffusion, sorption and permeability of binary solvent mixtures in polyethylene 8, 1865
Diffusion, sorption and - study of mutually penetrating networks based on polyurethane and its ionomer 1, 126
Diffusion constants, determination of the - of liquids in polymers by sorption and by internal reflection spectroscopy 8, 1853
Diffusional and kinetic factors, effect of - on the post-radiation oxidation of polyolefines 12, 2908
Diffusional transfer, the effect of crosslinkages in polymethyl methacrylate on the parameters and mechanism of - 2, 345
Diglycidyl ethers, effect of cyclization on the topological structure and properties of polymeric networks based on - and aromatic amines 8, 1873
α,ω-Dihydroxyoligodimethylsiloxane, regular networks based on - obtained in different conditions of dilution 2, 264
Dilatometers and dilatometric installations for the study of photo-initiated polymerization of liquid compounds based on oligourethane acrylates 10, 2555
Dilution, regular networks based on α,ω-dihydroxyoligodimethylsiloxane obtained in different conditions of - 2, 264
Dimethacrylic esters, study of the kinetics and thermodynamics of thermal breakdown of reticular polymers of - of n-alkylene glycols 10, 2378
Diemthylformamide, study of the structure of solutions and gels of polypyromellitimide and polyterephthalamide of anilinephthalein in - 6, 1457
Dimethyl sulphoxide, electrical birefringence of solutions of aromatic polyamide hydrazide in - 4, 978

Dioctyl sebaceate mixtures, phase diagrams of - with some polymers 4, 841
Diols, synthesis and study of polyesters based on asymmetrical - 6, 1437
Diphenylolpropane, ^{1}H and ^{13}C NMR analysis of the synthesis of polyarylene sulphonoxides based on - and dichlorodiphenylsulphone 5, 1183
Dipole relaxation, temperature coefficient of the activation energy of - and heat expansion of polymers 9, 2277
Discharge plasma, study of the structure of thin polysiloxane films prepared in - at low temperatures 12, 2864
Disperse structure and mechanical properties of extruded polypropylene–polystyrene blends 8, 1825
Dispersion, the influence of viscosity and - of incompatible polymers on fibre formation in their blends 7, 1617
Distribution curves, method of determining the linear rate of propagation of micro-crakcs by plotting - during deformation of polymers in liquid media 8, 2040
Distribution functions by size and friction coefficients of randomly branched macromolecules 6, 1289
Divinylbenzene, influence of the concentration of the crosslinking agent on the mechanical properties of ionite membranes based on a fluoroplastic and the copolymer of 2,5-methylvinylpyridine and - 11, 2718
Divinylbenzene, study of the structure and deformation properties of films from compositions of a fluoropolymer and copolymer of 2,5-methylvinylpyridine and - 4, 915
Divinyl ethers, synthesis of porous reticular copolymers of - of hydroquinone and diethylene glycol and their testing as sorbents in liquid chromatography 7, 1563
Dodecalactam, use of acticators in indirect action for controlling the rate of anionic polymerization of - 2, 473
Domain structure, effect of chemical structure of two-component melt of heteropolymers on the formation of - 9, 2232
Domain structure, fluctuations and the formation of - in heteropolymers 9, 2223
Donor-acceptor complexes, the part played by - in the photo- or electro-initiated isoprene copolymerization with mono-maleates 3, 637
Durability times, spectrum of - of polymer films 9, 2267
Dynamic birefringence, effect of solvents on - of polymer solutions 5, 1258
Dynamic heat ageing — a rapid method of evaluating the heat stability of polymers according to the variation of mechanical properties 6, 1508
Dynamics of the system of intermolecular hydrogen bonds in strained polymers 9, 2134
Dynamics, recrystallization phenomena in high molecular weight compounds and their role in - of melting 12, 2915
Dynamo-optical properties, the hydrodynamic and - of callulose dihydrate solutions 2, 358

Elastic deformation, features of the development of forced - during the stretching of glasslike polyethylene terephthalate in an adsorption-active medium 10, 2464
Elastic deformation, special features of - of uniaxially oriented high-density polyethylene 11, 2760
Elastic properties, relation between strength and - of polymers 9, 2241
Elastomer, influence of holding time on the processes of molecular ordering in a butadiene - 8, 1802

Elastomers, anisotropy of wetting and the molecular orientation capacity of - under deformation 8, 1944
Elastomers, determining of the degree of crystallinity of - under stretching 1, 59
Elastomers, influence of the pressure of gaseous madia on the relaxation properties of - 9, 2210
Elastomers, relaxation processes in crystallizing and non-crystallizing - 1, 67
Elastomers, the influence of ambient factors on the volume redistribution of ingredients in — 9, 2166
Electrical birefringence of solutions of aromatic polyamide hydrazide in dimethyl sulpoxide 4, 978
Electrical conductivity, on anomalies in the dependence of the - of polymeric ion-radical salts of 7,7,8,8-tetracyanoquimethane on aliphatic ionene polycation structure 4, 894
Electro-conductance, the - by non-polar polymers bombarded with low-energy electrons 1, 111
Electro-conductance, the - of polyethylene terephthalate induced by low-energy electron bombardment 1, 120
Electrolyte, distribution of electrolytes and phase equilibria in a cellulose ether–water–system 3, 704
Electro-optical properties of comb-like polymers with a different distance of the mesogenic side groups from the main chain 11, 2606
Electrophysical properties and molecular mobility of carborane-containing polyheteroarylenes 10, 2537
Electrophysical properties, effect of high pressure on certain - of iodine-doped polymer with a conjugation system 11, 2641
Electron bombardment, the electro-conductance of polyethylene terephthalate induced by low-energy - 1, 120
Electron spin-lattice relaxation, the - in pyrolyzed poly-2-methyl-5-ethylpyridine 1, 134
Electrons, the electro-conductance by non-polar polymers bombarded with low-energy - 1, 111
Elementary thermodynamic units, a study of the parameters of the - of macromolecules of heterochain polymers in melts 11, 2678
Elongation, spontaneous — of cellulose acetate plastics 3, 565
Enthalpy, multiplicity of the temperature dependence of the - of amorphous polymers in the vicinity of glass transition temperature 12, 2953
Epichlorohydrin oligomers, gel-permation chromatography of - 10, 2520
Epoxide, the role of proton-donors in cyclotrimerization of isocanates by the action of an amine– - catalytic system 11, 2768
Epoxide diane resins, methods of determining the composition of low-molecular weight - 8, 2034
Epoxide polymers, change in the supermolecular structure of - under the influence of solvents 11, 2646
Epoxides, infrared analysis of the conditions of synthesis of alkyl alumoxane complex catalysts influencing their activity in the copolymerization of - 7, 1688
Epoxides, the stabilization of polyvinyl chloride by - in the presence of salts of coordinatively unsaturated metals 11, 2671
3,4-Epoxyhexahydrobenzyl acrylate, copolymerization of - with vinyl monomers 4, 867
Epoxy-rubber, pulsed NMR study of - systems 11, 2747
Equilibrium branched polycondensation, consideration of cyclization in the theory - 10, 2477

Equilibrium swelling of filled vulcanizates of natural rubber 2, 455
ESR analysis of the thermal and thermooxidative degradation of polyamidoimide films 2, 393
ESR method, study of the initiating capacity of the trialkyl boron + tert. butylperoxytrimethyl silicon system in presence of vinyl monomers by the - 3, 493
Ethylene, effect of oxygen on the activity of a supported vanadium catalyst during phase polymerization of - 10, 2392
Ethylene, rheologocal properties of - –propylene copolymers at small shear stresses 6, 1488
Ethylene oxalate, calorimetric study of - , polyethylene oxalate and parameters of the polymerization of ethylene oxalate in the range 8–450 K 7, 1695
Ethylene-propylene rubber, homogenization of blends of polypropylene and - under shear in the presence of inorganic fillers 5, 1081
External field, the liquid-crystalline solution of persistent macromolecules in an - 12, 2958
External fileds, liquid-crystalline ordering in solutions of rigid macromolecules in the presence of - 8, 1989
Extruded polypropylene–polystyrene blens, disperse structure and mechanical properties of - 8, 1825
Extruded polypropylene–polystyrene blends, morphology of - 8, 1811

Ferric chloride, a comparative kinetic description of the photoreduction of - and tetraethyl ammonium tetrachloroferrate additives in solid polymethylmethacrylate 2, 378
Fibre, the influence of viscosity and dispersion of incompatible polymers on - formation in their blends 7, 1617
Fibres, chemical structure of polyphenylene-1,3,4-oxadiazole and - based on them 1, 41
Fibres, diffraction study of the structure of ion exchange - from polypropylene modified by grafted polystyrene 8, 1797
Fibres, supermolecular structure of graft copolymers of cotton and cellulose hydrate - with certain fluorine-containing polymers 4, 800
Filled polymers, relaxational φ-transition in - and molecular mobility of active filler particles 9, 2099
Films, ESR analysis of the thermal and thermooxidative degradation of polyamidoimide - 2, 393
Films, influence of the prehistory of formation of - from solutions on their longevity 11, 2626
Films, study of the structure and deformation properties of - from compositions of a fluoropolymer and copolymer of 2,5-methylvinylpyridine and divinylbenzene 4, 915
Flexible and rigid polymers, orientational strengthening of - 5, 1151
Flexible chain polymers, temperature dependence of expansion of crystalline lattices of some - 8, 1837
Flexible polymer chain, concentration dependence of the mean dimensions of the - in semi-dilute solutions as judged by "computer experimental" data 3, 518
Flurine-containing polymers, supermolecular structure of graft copolymers of cotton and cellulose hydrate fibres with certain - 4, 800
Fluoroplast films, microscope study of the structure and decomposition of - produced from powder by caking and condensation under vacuum 4, 861
Fluoroplastic, influence of the concentration of the crosslinking agent on the me-

chanical properties of ionite membranes based on a - and the copolymer of 2,5-methylvinylpyridine and divinylbenzene 11, 2718
Fluoropolymer, study of the structure and deformation properties of films from composition of a - and copolymer of 2,5-methylvinylpyridine and divinylbenzene 4, 915
Foam polyurethanes, use of the thermofluctuation concept of strength for evaluating the serviceability of — 5, 1042
Foamed elastic polyurethanes, a statistical study of the fracture of - under short-term loading 7, 1585
Fractionation, checking the selectivity of - by distribution between two liquid phases of polymers capable of forming hydrogen bonds 1, 185
Fracture, a statistical study of the - of foamed elastic polyurethanes under short-term loading 7, 1585
Free induction signal, the - from amorphous parts of partially crystalline polymers 12, 2971
Friction coefficients, distribution functions by size and - of randomly branched macromolecules 6, 1289

Gas phase polymerization, effect of oxygen on the activity of a supported vanadium catalyst during - of ethylene 10, 2392
Gaseous media, influence of the pressure of - on the relaxation properties of elastomers 9, 2210
Gases, permeability of - through an asymmetric polyvinyl trimethyl silane membrane 6, 1500
Gel-point, calculation of the - for non-equilibrium polycondensation taking into account the "substitution effect" 10, 2512
Gel points, calculation of - taking account of cyclization reactions 10, 2489
Gelatin, high resolution NMR analysis of conformation transitions in aqueous solutions of - 9, 2182
Gel-chromatograph, combination of a - with an automatic viscometer. Calibration according to molecular weight of the polymer correcting for instrumental broadening 9, 2295
Gel-penetration chromatography, possibilities of - as an absolute method of determining the parameters of the molecular weight distribution of polymethylmethacrylates 10, 2400
Gel-permeation chromatography of epichlorohydrin oligomers 10, 2520
Gel-permeation chromatography, study of block copolymers by - 6, 1512
Gels, study of the structure of solutions and - of polypyromellitimide and polyterephthalamide of anilinephthalein in dimethylformamide 6, 1456
Glass transition, radiation-induced low-temperature cationic graft polymerization of vinyl-n-butyl ether to polyvinyl chloride in the - 2, 440
Glass transition process, the - with oriented, flexible polymers 1, 77
Glass transition temperature, multiplicity of the temperature dependence of the enthalpy of amorphous polymers in the vicinity of the - 12, 2953
Glass transition temperatures, coefficients of translational and rotational diffusion of low-molecular compounds in polymers with various - 3, 592
Glasslike polyethyleneterephthalate, features of the development of forced elastic deformation during the stretching of - in an adsorption-active medium 10, 2464
Glassy state, experimental study of the volume compliance of polymeric systems in the - 10, 2440

Glow discharge, polymerization of polyfluoroaromatic compounds in - 1, 178
Glycerol, impulse-NMR study of polyvinyl chloride– - systems 4, 849
Glycidyl ether, conversions of the reactive polymerization centres in - by tertiary amines 2, 335
Graft copolymers, supermolecular structure of - of cotton and cellulose hydrate fibres with certain fluorine-containing polymers 4, 800
Graft copolymers, the synthesis of - of polycaproamide with polydimethylamino-ethyl methacrylate, using a reversible redox system 11, 2663
Graft polymerization, radiation-induced - of acrylic acid to powdered low-pressure polyethylene 8, 2015
Graft polymerization, the radiation-induced - of acryloyl chloride to polyethylene and polyethylene terephthalate 2, 406
Grafted polystyrene, diffraction study of the structure of ion exchange fibres from polypropylene modified by - 8, 1797

^{1}H and ^{13}C NMR analysis of the synthesis of polyarylene sulphonoxides based on diphenylolpropane and dichlorodiphenylsulphone 5, 1183
^{1}H and ^{13}C NMR method, study of polyether thermoelastoplasts by the - 9, 2149
^{1}H and ^{13}C NMR spectra, relation between chemical shift values in - of vinyl monomers and some parameters of their reactivity in radical polymerization and copolymerization 9, 2252
Halogen-containing polyarylate-sulphone block copolymers, the synthesis and properties of - 12, 2941
Haloidaromatic esters, synthesis and properties of polymers of - of 2-methyl-1,3-butadienylphosphonic acid 4, 930
HCl acceptors, kinetics of the dehydrochlorination of polyvinylchloride in a closed system in the presence of - 9, 2195
Heat expansion, temperature coefficient of the activation energy of dipole relaxation and - of polymers 9, 2277
Heat of wetting and porous structure of network copolymers 12, 2903
Heat stability, dynamic heat ageing—a rapid method of evaluating the - of polymers according to the variation of mechanical properties 6, 1508
Heating, the hydrogen bond and its effect on spontaneous orientation during the - of aromatic polyamides 5, 1109
Heterochain polymers, a study of the parameters of the elementary thermodynamic units of macromolecules of - in melts 11, 2678
Heterogeneity, study of unit - of polyheteroarylenes by NMR spectroscopy. Review 9, 2047
Heterogeneous polyamides, synthesis and study of - containing *m*-carborane 11, 2788
Heterogeneous reaction, study of the — of formation of primary products of addition in the synthesis of phenol-formaldehyde and naphthalene-phenol-formaldehyde oligomers 6, 1421
Heterogeneous Ziegler–Natta catalysts, study of the interaction of components of - using the Monte Carlo method 12, 2985
Heterogenization, structural — processes in rubber–oligomer compositions 9, 2215
Heteropolymers, effect of chemical structure of two-component melts of - on the formation of domain structure 9, 2232
Heteropolymers, fluctuations and the formation of domain structure in - 9, 2223
Hexamethyl cyclotrisiloxane, anionic non-equilibrium copolymerization of - with *cis* and *trans*-isomers of 1,3,5-trimethyl-1,3,5-triphenyl cyclotrisiloxane 1, 27

Hexamethylcyclotrisiloxane, polymerization of - by α,ω-bis-(tetramethylammonium) oligodimethylsiloxane in the presence of trimethylsilanol 8, 1998
High-density polyethylene, special features of elastic deformation of uniaxially oriented - 11, 2760
High molecular weight compounds, rescrystallization phenomena in — and their role in dynamics of melting 12, 2915
High pressure, effect of - on certain electrophysical properties of iodine-doped polymers with a conjugation system 11, 2641
High pressure, kinetic features of polymerization of 1,1,2,3-tetrachlorobuta-1,3-diene under - 12, 3015
High pressure, physico-mechanical properties of polymers subjected to the simultaneous action of - and shear deformation 1, 211
High pressure, the energies and volumes of activation of plastic flow of some polymers under - 9, 2160
High pressure polyethylene, determination of the molecular weight distribution of - and calculation of the rate constants of the main chemical reaction 6, 1367
High pressures, a calorimetric study of changes in crystalline polymers and their blends under the simultaneous action of - and shear strains 5, 1073
High resolution NMR analysis of conformation transitions in aqueous solutions of gelatin 9, 2182
High-temperature polymer superconductors, state of research into the production of - . Review 2, 229
High temperature pyrolysis, the effect of phosphorus on the - of polymethylmethacrylate 1, 73
Homo- and copolymers, analysis of the content and distribution of the double bonds for vinyl chloride - with a different molecular mass distribution 5, 1047
Homogenization of blends of polypropylene and ethylene-propylene rubber under shear in the presence of inorganic fillers 5, 1081
Hydration, IR spectroscopic study of - of cellulose acetates and polyvinyl acetate 11, 2778
Hydration, IR-spectroscopic study of - of the carboxyl-containing cellulose and polyacrylic acid 6, 1279
Hydration numbers, method of determining - of polymers in solution 12, 3034
Hydrocarbon, main regularities of polymerization of butadiene by the action of a composite sodium–aluminium organic initiator in - medium 7, 1742
Hydrodynamic and conformational properties of molecules of the poly-*p*-methacryloyl oxybenzoic ester of *p*-n-nonyloxyphenol 7, 1671
Hydrodynamic and dynamo-optical properties, the - of cellulose dinitrate solutions 2, 358
Hydrodynamic characteristics and light scattering of solutions of a styrene–acrylonitrile copolymer prepared in a precipitant 7, 1734
Hydrogen bond, effect of the - on the intramolecular organization of polymers containing cholesterol 5, 1248
Hydrogen bond, the - and its effect on spontaneous orientation during the heating of aromatic polyamides 5, 1109
Hydrogen bonds, checking the selectivity of fractionation by distribution between two liquid phases of polymers capable of forming - 1, 185
Hydrogen bonds, dynamics of the system of intermolecular - in strained polymers 9, 2134
Hydrogen peroxide, study of oligomerization of isoprene on initiation with - 6, 1312
Hydrogenation, complex of Rh(III) and polyethyleneimine and their catalytic activity in - of cyclohexene 7, 1775
Hydroquinone, on features of the oligomerization of - under auto-oxidation 10, 2434

Hydroquinone, synthesis of porous reticular copolymers of divinyl ethers of - and diethylene glycol and their testing as sorbents in liquid chromatography 7, 1563
Hydroperoxide groups, inhibiting action of bis-phenols on oxidation of polypropylene containing - 4, 938
Hydroxyl-containing compounds, relative reactivity of organosilicon oligomers with terminal isocyanate groups in reactions with - 4, 769
Hydroxyl end groups, kinetics of interaction of *m*-chlorophenylisocyanate with - of oligobutadienes 4, 964

Imidization, investigation of the kinetics of chemical - 4, 791
Impulse-NMR study of polyvinyl chloride–glycerol systems 4, 849
Incompatible polymers, the influence of viscosity and dispersion of - on fibre formation in their blends 7, 1617
Indole-containing luminescent groups, polarized luminescence of polymers with - 8, 1896
Indolinospiropyranes, special aspects of the photochromism of - in comb-like polymers 11, 2635
Infrared analysis of the conditions of synthesis of alkyl alumoxane complex catalysts influencing their activity in the copolymerization of epoxides 7, 1688
Infrared investigation of the structure of urea-formaldehyde oligomers synthesized in the presence of amines 8, 1974
Inhibited oxidation, mechanism of degradation of *cis*-1,4-poly-isoprene in conditions of - 12, 2859
Inhibited radical polymerization, kinetic description of - considering reagent consumption 4, 987
Inhibiting action of bis-phenols on oxidation of polypropylene containing hydroperoxide groups 4, 938
Inhibiting action, polymeric nature of the - of polyarylene methylenes 4, 952
Inhibition, study of kinetics of - of thermo-oxidation of polyethylene by carbon black 6, 1462
Inhibition, thermal polymerization of styrene and its - . Kinetics and mechanism. Review 7, 1527
Inhibition effect, the detection and study of the localized (selective) - in the radical-initiated three-dimensional polymerization of triethylene glycol dimethacrylate 1, 149
Inhibitors, application of some - to the study of radical initiation 7, 1749
Initiation, chemical modification and calcium carbonate surface by 4-azo-bis-4-cyanpentanoic acid and its effect on - and polymerization 4, 808
Initiator, effect of the nature of the - on the kinetics of polymerization of vinylchloride at high conversions and on the thermal stability of polyvinylchloride 6, 1360
Initiator, kinetic parameters of inhibited radical polymerization based on the dependence of the initial rate on the concentration of - and monomer 4, 877
Initiators, polymerization of butadiene under the action of sodium organic - in slightly polar media 2, 388
Inorganic compounds, structurization of low molecular weight - introduced into polymers during their deformation in liquid media 6, 1430
Inorganic fillers, homogenization of blends of polypropylene and ethylene-propylene rubber under shear in the presence of - 5, 1081
Intermacromolecular reactions, cooperative - with lignosulphonates 7, 1725
Intermolecular hydrogen bonds, dynamics of the system of - in strained polymers 9, 2134

Intermolecular interaction, potential of the - and initial viscosity of polymer melts in model of overlapping statistical coils 10, 2347
Intermolecular interaction, results of study of - in polyarylates 10, 2326
Intramolecular organization of polymers, effect of hydrogen bonds on the - containing cholesterol 5, 1248
Intramolecular structuring in solutions of comb-like polymers 1, 1
Iodine-doped polymers, effect of high pressure on certain electrophysical properties of - with a conjugation system 11, 2641
Ionite membrane, influence of the concentration of the crosslinking agent on the mechanical properties of - based on a fluoroplastic and the copolymer of 2,5-methylvinylpyridine and divinylbenzene 11, 2718
Ionogenic groups, investigation of the effect of - on molecular mobility in polyestermaleate 8, 1859
Ionomer, sorption and diffusion study of mutually penetrating networks based on polyurethane and its - 1, 126
Ions, macromolecular macrocyclic compounds: binding of - , small molecules and polymers. Review 5, 1007
IR region, spectrophotometric titration in the - of 2-methyl-5-vinyl pyridine–acrylic acid copolymers 1, 205
IR spectroscopic study of hydration of cellulose acetates and polyvinyl acetate 11, 2778
IR-spectroscopic study of hydration of the carboxyl-containing celluloses and polyacrylic acid 6, 1279
Isocyanate groups, relative reactivity of organosilicon oligomers with terminal - in reactions with hydroxyl-containing compounds 4, 769
Isocyanates, the role of proton-donors in cyclotrimerization of - by the action of an amide–epoxide catalytic system 11, 2768
Isomers, a ^{13}C NMR study of structural - and compositional sequences in oligoesters based on propylene oxide and maleic anhydride 3, 549
Isoprene, investigation of the mesomorphic properties of solutions of an isoprene–α-methylstyrene– - triblock copolymer 6, 1327
Isoprene, study of oligomerization of - on initiation with hydrogen peroxide 6, 1312
Isoprene, study of the alternating copolymerization of - and propylene using complex compounds of titanium and vanadium as catalysts 10, 2457
Isoprene copolymerization, the part played by donor-acceptor complexes in the photo- or electro-initiated - with mono-maleates 3, 637
Isoprene rubber, kinetics of changes in molecular characteristics of - (SKI-3) during melting 4, 945
Isotactic polypropylene, the decay of peroxide macroradicals in the crystalline phase of - 6, 1402
Isotropic and oriented blends, action of ozone on - of polypropylene and polyethylene. On the influence of deformation on the rate of oxidation 11, 2754
Ion exchange fibres, diffraction study of the structure of - from polypropylene modified by grafted polystyrene 8, 1797

Kinepectic reinforcement and relaxation of coordination-polymer gels of aluminium soaps 7, 1709
Kinetic characteristics of the inhibiting effect of 4-tert-butyl-2,6-dimercaptophenol on oxidation of polypropylene 2, 462

Kinetic description, a comparative - of the photoreduction of ferric chloride and tetraethyl ammonium tetrachloroferrate additives in solid polymethylmethacrylate 2, 378
Kinetic description of inhibited radical polymerization considering reagent consumption 4, 987
Kinetic factors, effect of diffusional and - on the post-radiation oxidation of polyolefines 12, 2908
Kinetic features of polymerization of 1,1,2,3-tetrachlorobuta-1,3-diene under high pressure 12, 3015
Kinetic features of the non-catalytic reaction of phenol with phenylglycidyl ether 12, 2895
Kinetic features, the study of - of the radical polymerization of styrene, initiated by *o,o'*-carbo-tert-butylperoxysuccinyl peroxide 1, 98
Kinetic parameters of inhibited radical polymerization based on the dependence of the initial rate on the concentration of initiator and monomer 4, 877
Kinetic study of solid-phase reactions with the participation of radicals 9, 2173
Kinetics and mechanism of decay of peroxide radicals in oxidation of solid polypropylene 1, 217
Kinetics, analysis of the thermal cyclization - of solid-state polyamic acids 5, 1103
Kinetics, effect of the nature of the initiator on the - of polymerization of vinylchloride at high conversions and on the thermal stability of polyvinylchloride 6, 1360
Kinetics, features of the - of deformation of oriented polyethylene 5, 1212
Kinetics, influence of the porosity of cyrboxyl carbonites of Solose K on the diffusion and - of H_2O sorption 10, 2452
Kinetics, influence of the structural ordering of liquid oligomers on the - of radiation-induced polymerization 11, 2713
Kinetics, investigation of the - of chemical imidization 4, 791
Kinetics, method for the study of - of photopolymerization in the lower layer of pigmented films 9, 2287
Kinetics of changes in molecular characteristics of isoprene rubber (SKI-3) during melting 4, 945
Kinetics of interaction of *m*-chlorophenylisocyanate with hydroxyl end groups of oligobutadienes 4, 964
Kinetics of radiation polymerization of allylpyridazones 2, 286
Kinetics of radiation polymerization of tetrafluoroethylene adsorbed on silica gel at 196°K 2, 279
Kinetics of radical polymerization of 1-vinyl-1,2,4-triazole 10, 2529
Kinetics of the dehydrochlorination of polyvinylchloride in a closed system in the presence of HCl acceptors 9, 2195
Kinetics of the thermal oxidation of polydimethylphenylene oxide 4, 902
Kinetics, polarographic analysis of - of synthesis of polyelectrolytes by combination of depolarizer ions with macromolecules 3, 732
Kinetics, study of - of inhibition of thermo-oxidation of polyethylene by carbon black 6, 1462
Kinetics, study of the - and thermodynamics of thermal breakdown of reticular polymers of dimethacrylic esters of n-alkylene glycols 10, 2378
Kinetics, the crystallization - of block copolymer mixtures and multiple blocks of polyoxythylene and polyarylate 5, 1116
Kinetics, thermal polymerization of styrene and its inhibition. - and mechanism. Review 7, 1527

dl-**Lactide,** thermodynamics of - , polylactide and polymerization of *dl*-lactide in the range of 0–430 K 7, 1702
Ladder type polyphenylsiloxanes, conformational and optical properties of molecules of - and its chlorinated derivatives 10, 2405
Latex polymers, dielectric and nuclear magnetic relaxation in - in relation to their morphological properties 5, 1159
Light absorption, the evolution of - induced in polymers by photo-ageing 5, 832
Light scattering, anisotropic - with the persistent chain model 2, 314
Light scattering, hydrodynamic characteristics and - of solutions of a styrene–acrylonitrile copolymer prepared in a precipitant 7, 1734
Lignosulphonates, cooperative intermacromolecular reactions with - 7, 1725
Liquid chromatography, determining coefficients K_s and a for oligomers using - 3, 728
Liquid chromatography, molecular weight analysis of oligomers using highly efficient exclusion - 8, 2024
Liquid compounds, dilatometers and dilatometric installations for the study of photo-initiated polymerization of - based on oligourethane acrylates 10, 2555
Liquid-crystalline ordering in solutions of rigid macromolecules in the presence of external fields 8, 1989
Liquid-crystalline solution, the - of persistent macromolecules in an external field 12, 2958
Liquid media, method of determining the linear rate of propagation of micro-cracks by plotting distribution curves during deformation of polymers in - 8, 2040
Liquid media, structurization of low molecular weight inorganic compounds introduced into polymers during their deformation in - 6, 1430
Liquid medium, conformation transitions in polyethylene terephthalate on crystallization by the action of a - 2, 468
Liquid oligomers, influence of the structural ordering of - on the kinetics of radiation-induced polymerization 11, 2713
Liquid organic media, on the nature of the influence of - on the mechanical properties of glassy polymers 9, 2187
Liquid plasticizing media, the influence of - on the deformation of crystalline polyolefines 8, 1927
Liquid thiokol, effect of mineral salts on the structure of - 5, 1243
Lipid bilayer, structure of the - . "Computer experimental" and "scaling" theory 10, 2356
Loading, a statistical study of the fracture of foamed elastic polyurethanes under short-term - 7, 1585
Low concentrations, on the use of a real gas model to describe the properties of polymer solutions in the region of extremely - 12, 2929
Low deformation, relaxation time spectra of polymers in the range of - 6, 1468
Low density polyethylene, relaxational spectrometry of - 9, 2107
Low-molecular compounds, coefficients of translational and rotational diffusion of - in polymers with various glass transition temperatures 3, 592
Low molecular weight compounds, formation of - during mechanical degradation of macromolecules 9, 2202
Low molecular weight compounds, the mechanism of thermal degradation of - modelling the structure of network polymers based on diepoxides and aromatic and aliphatic amines 3, 647
Low-molecular weight epoxide diane resins, methods of determining the composition of - 8, 2034
Low molecular weight fractions, effect of - and side branches in the main chain of the

macromolecules on the recrystallization process during pressure annealing of polyethylene 10, 2385
Low molecular weight inorganic compounds, structurization of - introduced into polymers during their deformation in liquid media 6, 1430
Low molecular weight products of the breakdown of peroxide radicals in polystyrene and polyvinylcyclohexane at room temperature 1, 190
Low molecular weight products, on the influence of secondary - on the polymerization rate of propylene by the $TiCl_3$-based catalytic system 2, 412
Low-substituted soluble cellulose acetates, preparation and study of properties of primary - 6, 1495
Low temperature radiation polymerization of tetrafluoroethylene in the glassy matrix of perfluoroalkanes 3, 511
Low temperatures, study of the structure of thin polysiloxane films prepared in discharge plasma at - 12, 2864
Luminescence, intrachain - quenching in solutions of anthracene-containing polymers based on plymethyl methacrylate 7, 1578
Luminescence, polarized - of polymers with indole-containing luminescent groups 8, 1896

Macromolecular macrocyclic compounds: biding of ions, small molecules and polymers. Review 5, 1007
Macromolecular therapeutic systems, physiologically active polymers and - 4, 743
Macromolecules, a study of the parameters of the elementary thermodynamic units of - of heterochain polymers in melts 11, 2678
Macromolecules, conformation and optical anisotropy of comb-like - with mesogenic side groups 10, 2340
Macromolecules, diagram of state for a solution of semi-rigid - 10, 2416
Macromolecules, distribution functions by size and friction coefficients of randomly branched - 6, 1289
Macromolecules, distribution of branching centres along - in branched radical polymerization 2, 445
Macromolecules, effect of low molecular weight fractions and size branches in the main chain of the - on the recrystalilzation process during pressure annealing by polyethylene 10, 2385
Macromolecules, formation of low molecular weight compounds during mechanical degradation of - 9, 2202
Macromolecules, liquid-crystalline ordering in solutions of rigid - in the presence of extremal fields 8, 1989
Macromolecules, molecular weight distribution and distribution of branching centres along - during radical polymerization of vinyl monomers with the formation of unsaturated end groups 7, 1767
Macromolecules, nomenclature and terminology in the field of - 1, 226
Macromolecules, notes on the theory of adsorption of a single - 6, 1344
Macromolecules, phase transitions on adsorption of - 9, 2088
Macromolecules, polarographic analysis of kinetics of synthesis of polyelectrolytes by combination of depolarizer ions with - 3, 732
Macromolecules, refractometric method of analysis of chemical conversions of - in solution 11, 2813
Macromolecules, structural transformations in polymer - with mesogenic groups in side chains 4, 922

Macromolecules, substitution reactions in ternary systems of - 2, 367
Macromolecules, the features of orientation of - in polytetrafluoroethylene films 7, 1611
Macromolecules, the liquid-crystalline solution of persistent - in an external field 12, 2958
Macroradicals, the decay of peroxide - in the crystalline phase of isotactic polypropylene 6, 1402
Macroscopic stages of peroxide initiator conversions in polyamides 6, 1407
Maleic anhydride, a ^{13}C NMR study of structural isomers and compositional sequences in oligoesters based on propylene oxide and - 3, 549
Mass spectrometric thermal analysis of the cyclodehydration of polyamic acids 12, 2922
Mass-spectrometry, study of mixtures of polyethylene and polydeuteroethylene by secondary emission - 2, 487
Mathematical modelling of caprolactam polymerization 5, 1091
Mathematical simulation, application of - for the analysis of molecular weight heterogeneity of polymers by rapid sedimentation and viscometry 6, 1518
Mechanical behaviour, the - of polyvinyl chloride and of PVC blended with a rubber modifier over a wide range of deformation rates 10, 2472
Mechanical degradation, formation of low molecular weight compounds during - of macromolecules 9, 2202
Mechanical field, birefringence of polymethylmethacrylate in a sinusoidal - 6, 1306
Mechanical properties, disperse structure and - of extruded polypropylene–polystyrene blends 8, 1825
Mechanical properties, dynamic heat ageing—a rapid method of evaluating the heat stability of polymers according to the variation of - 6, 1508
Mechanical properties, influence of the concentration of the crosslinking agent on the - of ionite membrane based on a fluoroplastic and the copolymer of 2,5-methylvinylpyridine and divinylbenzene 11, 2718
Mechanical properties, on the nature of the influence of liquid organic media on the - of glassy polymers 9, 2187
Mechanical properties, reasons for lowering of - of polymers during deformation in adsorption-active media 11, 2706
Mechanical properties, the - of highly dispersed oriented polyethylene terephthalate 9, 2120
Melt index, relationship between the - and the value of expansion of a jet of a polymer melt flowing out of a hole 6, 1269
Melting, kinetics of changes in molecular characteristics of isoprene rubber (SKI-3) during - 4, 945
Melting, recrystallization phenomena in high molecular weight compounds and their role in the dynamics of - 12, 2915
Melting point, equilibrium in the system polycaproamide–caprolactam–water below the - of the polymer 6, 1319
Melts, a study of the parameters of the elementary thermodynamic units of macromolecules of heterochain polymers in - 11, 2678
Mesogenic groups, intramolecular mobility of polymers with - in the side chains 7, 1664
Mesogenic groups, structural transformations in polymer macromolecules with - in side chains 4, 922
Mesogenic side group, electro-optical properties of comb-like polymers with different distance of the - from the main chain 11, 2606
Mesogenic side groups, conformation and optical anisotropy of comb-like macromolecules with - 10, 2340
Mesomorphic properties, investigation of the - of solutions of an isoprene–α-methylstyrene–isoprene triblock copolymer 6, 1327

Metal, oligometalphenyl siloxanes and the effect of the type of - on their properties 4, 996
Metal atoms, using the effect of re-evaporation of - for the study of surface properties of polymers 5, 1254
Metal compounds, concerning the degradation of polyoxyethylene fragments of oxyethylated compounds during complex-formation with transition - 6, 1351
Metal-containing oligoethylphenylsiloxanes, on the influence of the metal on the properties of - 8, 1920
Metals, the stabilization of polyvinyl chloride by epoxides in the presence of salts of coordinatively unsaturated - 11, 2671
Metathesis catalysts, investigation of the mechanism of polypentenamer degradation in the presence of - 1, 164
Methacrylic acid, viscoelastic properties of plastisols based on the copolymer of methyl methacrylate and - during their transition to plastigels 12, 2947
2-Methyl-1,3-butadienylphosphonic acid, synthesis and properties of polymers of haloidaromatic esters of - 4, 930
1-Methylcyclooctadiene polymer, structure of - as judged by the ^{13}C NMR spectra 4, 775
Methylmethacrylate, effect of the physico-mechanical properties of - , butadiene and styrene copolymers on the impact strength of their compositions with polyvinylchloride 4, 824
Methyl methacrylate, relation of auto-acceleration in radical polymerization of - in bulk structural changes of the polymerizing system 10, 2547
Methyl methacrylate, viscoelastic properties of plastisols based on the copolymer of - and methacrylic acid during their transition to plastigels 12, 2947
N-methylolacrylamide, a spectroscopic study of the thermo-oxidative degradation of copolymers of acrylonitrile with - 7, 1597
α-Methylstyrene, investigation of the mesomorphic properties of solutions of an isoprene– - –isoprene triblock copolymer 6, 1327
2,5-Methylvinylpyridine, influence of the concentration of the crosslinking agent on the mechanical properties of ionite membranes based on a fluoroplastic and the copolymer of - and divinylbenzene 11, 2718
2-Methyl-5-vinyl pyridine, spectrophotometric titration in the IR region of - –acrylic acid copolymers 1, 205
2,5-Methylvinylpyridine, study of the structure and deformation properties of films from composition of a fluoropolymer and copolymer of - and divinylbenzene 4, 915
Microscope study of the structure and decomposition of fluoroplast films produced from powder by caking and condensation under vacuum 4, 861
Micro-cracks, method of determining the linear rate of propagation of - by plotting distribution curves during deformation of polymers in liquid media 8, 2040
Mineral salts, effect of - on the structure of liquid thiokol 5, 1243
Molecular mass distribution, analysis of the content and distribution of the double bonds for vinyl chloride homo- and copolymers with a different - 5, 1047
Molecular mobility, electrophysical properties and - of carborane-containing polyheteroarylenes 10, 2537
Molecular mobility in ternary block copolymer solutions 4, 873
Molecular mobility, investigation of the effect of ionogenic groups on - in polyestermaleate 8, 1859
Molecular mobility, relaxational φ-transition in filled polymers and - of active filler particles 9, 2099
Molecular mobility, study of - in filled and unfilled crosslinked organosilicon rubbers 10, 2422

Molecular mobility, study of the structure and - of crystalline polyethylene by the methods of photo-elasticity and torsion pendulum 7, 1551
Molecular networks, the study of relaxational properties of - of polyoctafluoroamyl methacrylate by photoelasticity and torsion pendulum methods 9, 2128
Molecular ordering, influence of holding time on the process of - in a butadiene elastomer 8, 1802
Molecular orientation, anisotropy of wetting and the - capacity of elastomers under deformation 8, 1944
Molecular structure, effect on properties of the - of polydiethylene glycol-sebacates 1, 200
Molecular weight, combination of a gel-chromatograph with an automatic viscometer. Calibration according to - of the polymer correcting for instrumental broadening 9, 2295
Molecular weight studies of polyarylates with short branches 1, 142
Molecular weight, the - and volume of spin probes and their effects on their rotation capacity in polymers 1, 105
Molecular weight analysis of oligomers using highly efficient exclusion liquid chromatography 8, 2024
Molecular weight distribution and distribution of branching centres along macromolecules during radical polymerization of vinyl monomers with the formation of unsaturated end groups 7, 1767
Molecular weight distribution, calculation of - of products of non-equilibrium polycondensation, considering the "substitution effect" 10, 2499
Molecular weight distribution, determination of the - of high pressure polyethylene and calculation of the rate constants of the main chemical reactions 6, 1367
Molecular weight distribution, on the - of polyarylates 2, 400
Molecular weight distribution, possibilities of gel-penetration chromatography as an absolute method of determining the parameters of the - of polymethylmethacrylates 10, 2400
Molecular weight distribution, visco-elastic properties of linear polymers and their mixtures with narrow - 5, 1194
Molecular weight heterogeneity, application of mathematical simulation for the analysis of - of polymers by rapid sedimentation and viscometry 6, 1518
Molecules, conformational and optical properties of - of ladder type polyphenylsiloxane and its chlorinated derivatives 10, 2405
Molecules, hydrodynamic and conformational properties of - of the poly-*p*-methacryloyl oxybenzoic ester of *p*-n-nonyloxyphenol 7, 1671
Molecules, macromolecular macrocyclic compounds: binding of ions, small - and polymers. Review 5, 1007
Molecules, sedimentational-diffusional and viscometric studies on solutions of poly-*m*-phenylene isophthalamide and the equilibrium rigidity of its - 11, 2689
Mono-functional components, determining the proportion of - in oligoesters by thin-layer chromatography 9, 2290
Mono-maleates, the part played by donor-acceptor complexes in the photo- or electro-initiated isoprene copolymerization with - 3, 637
Monomer, kinetic parameters of inhibited radical polymerization based on the dependence of the initial rate on the concentration of initiator and - 4, 877
Monomers units, matrix synthesis of copolymer chains with definite alternation of - 8, 1909
Monomers, copolymerization of 3,4-epoxyhexahydrobenzyl acrylate with vinyl - 4, 867
Monomers, functionality of - and structure of polymers obtained by polycondensation. Review 8, 1783

Monomers, polymerization of vinyl - on the surface of chalk activated by dicarboxyl-containing peroxide 8, 1883
Monomers, relation between chemical shift values in ^{1}H and ^{13}C NMR spectra of vinyl - and some parameters of their reactivity in radical polymerization and copolymerization 9, 2252
Monomers, study of the formation of polymer coatins by capsulation of solids by radiation-induced polymerization of - from the vapour-phase 3, 696
Monomers, study of the initiating capacity of the trialkyl boron + tert-butylperoxytrimethyl silicon system in presence of vinyl - by the ESR method 3, 493
Monte Carlo method, study of the interaction of components of heterogeneous Ziegler–Natta catalysts, using the - 12, 2985
Morphological peculiarities, dielectric and nuclear magnetic relaxation in latex polymers in relation to their - and mechanical properties 5, 1159
Morphology of extruded polypropylene–polystyrene blends 8, 1811
Morphology, the - of polypropylene granules and its link with the titanium chloride texture 3, 599

Naphthalene-phenol-formaldehyde, study of the heterogeneous reaction of formation of primary products of addition in the synthesis of phenol-formaldehyde and - oligomers 6, 1421
Network copolymers, heat of wetting and porous structure of - 12, 2903
Network polymers, the mechanism of thermal degradation of low molecular weight compounds modelling the structure of - based on diepoxides and aromatic and aliphatic amines 3, 647
Networks, regular - based on α,ω-dihydroxyoligodimethylsiloxane obtained in different conditions of dilution 2, 264
Nitrocellulose, nuclear magnetic relaxation and segmental motion of - in solution 6, 1335
Nitrogen-phosphorus, study of complex formation of copper (II) with ampholytes containing - 3, 678
Nitroxyl radicals, formation of - during polyamide transformations initiated by peroxides 3, 686
NMR analysis, high resolution - of conformation transitions in aqueous solutions of gelatin 9, 2182
NMR analysis of the crystallization of oligoesters and urethane rubbers 5, 1170
NMR free induction, study of the shape of decay of - in polyurethanes 8, 1967
NMR relaxation and the state of solvent molecules in solutions of polyvinylchloride and polystyrene in dibutylphthalate 12, 3024
NMR spectroscopy, study of unit heterogeneity of polyheteroarylenes by - . Review 9, 2047
NMR study, pulsed - of epoxy-rubber systems 11, 2747
Non-catalytic reaction, kinetic features of the - of phenol with phenylglycidyl ether 12, 2895
Non-oriented polymers, model for volumetric rupture of - 3, 533
p-n-**Nonyloxyphenol,** hydrodynamic and conformational properties of molecules of the poly-*p*-methacryloyl oxybenzoic ester of - 7, 1671
Nuclear magnetic relaxation and segmental motion of nitrocellulose in solution 6, 1335
Nuclear magnetic relaxation, dielectric and - in latex polymers in relation to their morphological properties 5, 1159
Nuclei, thermodynamics of the formation of secondary - 12, 2888

Oligoamines, reactivity of aromatic - and oligochlorides on polycondensation in aqueous-organic media 3, 673
Oligoarylene sulphonoxides, properties of irregular poly-(arylate-arylene sulphonoxides) based on - with various degrees of polymerization 9, 2259
Oligobutadienes, kinetics of interaction of *m*-chlorophenylisocyanate with hydroxyl end groups of - 4, 964
Oligochlorides, reactivity of aromatic oligoamines and - on polycondensation in aqueous-organic media 3, 673
Oligoesters, a ^{13}C NMR study of structural isomers and compositional sequences in - based on propylene oxide and maleic anhydride 3, 549
Oligoesters, determining the proportion of mono-functional components in - by thin-layer chromatography 9, 2290
Oligoesters, NMR analysis of the crystallization of - and urethane rubbers 5, 1170
Oligoether acrylate, phase equilibrium in the polyvinyl chloride– - systems 3, 505

Permeability of gases through an asymmetric polyvinyl trimethyl silane membrane 6, 1500
Peroxide, polymerization of vinyl monomers on the surface of chalk activated by dicarboxyl-containing - 8, 1883
Peroxide initiator conversions, macroscopic stages of - in polyamides 6, 1407
Peroxide macroradicals, the decay of - in the crystalline phase of isotactic polypropylene 6, 1402
Peroxide radicals, kinetics and mechanism of decay of - in oxidation of solid polypropylene 1, 217
Peroxide radicals, low molecular weight products of the breakdown of - in polystyrene and polyvinylcyclohexane at room temperature 1, 190
Peroxides, formation of nitroxyl radicals during polyamide transformations initiated by - 3, 686
Persulphate, study of the effect of tris-(2-carbamoylethyl)-amine on the initiation of polymerization of acrylamide by - 7, 1719
Phase condition, the - and viscous properties of sulphuric acid solutions of polymers and copolymers based on *p*-phenylene amides 5, 1085
Phase diagrams of dioctyl sebaceate with some polymers 4, 841
Phase equilibria, distribution of electrolytes and - in a cellulose ether–water–electrolyte system 3, 704
Phase equilibrium, study of - by refractometry and the determination of second virial coefficients of polymer–plasticizer systems 3, 738
Phase state, classification of polymers according to their - 8, 1939
Phase structure and properties of cured oligomer–polymer compositions 7, 1655
Phase transitions on adsorption of macromolecules 9, 2088
Phenol, kinetic features of the non-catalytic reaction of - with phenylglycidyl ether 12, 2895
Phenol-formaldehyde, study of the heterogeneous reaction of formation of primary products of addition in the synthesis of - and naphthalene-phenol-formaldehyde oligomers 6, 1421
Phenolformaldehyde oligomers, effect of the structure of - on their interaction with aluminium γ-oxide 7, 1762
Phenolphthalein, study of the synthesis of polyarylene sulphonoxides based on - and dichlorodiphenylsulphone by ^{13}C NMR 5, 1218
Phenols, sterically hindered - —antioxidants for polyolefines. Relation of antioxidative activity to structure. Review 9, 2063
Phenyl isocyanate, co-cyclotrimerization of 2,4-toluylene diisocyanate and - 11, 2700
***p*-Phenylene amides,** the phase condition and viscous properties of sulphuric acid solutions of polymers and copolymers based on - 5, 1085
Phenylglycidyl ether, kinetic features of the non-catalytic reaction of phenol with - 12, 2895
Phosphoric acid esters, features of combustion of polymethyl methacrylate compositions with some - 4, 971
Phosphorus containing cellulose derivatives, new - 9, 2115
Phosphorus, the effect of - on the high temperature pyrolysis of polymethylmethacrylate 1, 73
Photo-ageing, the evolution of light absorption induced in polymers by - 4, 832
Photochromism, special aspects of the - of indolinospiropyranes in comb-like polymers 11, 2635
Photo-elasticity, study of the structure and molecular mobility of crystalline polyethylene by the methods of - and torsion pendulum 7, 1551
Photoelasticity, the study of relaxational properties of molecular networks of polyoctafluoroamyl methacrylate by - and torsion pendulum methods 9, 2128

Photo-initiated polymerization, dilatometers and dilatometric installations for the study of - of liquid compounds based on oligourethane acrylates 10, 2555
Photo-oxidation, change in the physicomechanical properties of polyethylene on - 2, 257
Photo-oxidation of 2,6-di-(4′-azidobenzal)cyclohexanone in polystyrene films 8, 1845
Photo-oxidation, the effects of orientation and crystallinity on the resistance of polyethylene terephthalate to - 5, 1138
Photopolymerization, method for the study of kinetics of - in the lower layer of pigmented films 9, 2287
Photoreduction, a comparative kinetic description of the - of ferric chloride and tetraethyl ammonium tetrachloroferrate additives in solid polymethylmethacrylate 2, 378
Physical stress-relaxation, power law for slow - in the rubbery condition and its experimental verification 2, 322
Physical transitions, thermo-optical method of determining temperatures of - in crystallizing plasticizers 11, 2826
Physiologically active polymers and macromolecular therapeutic systems 4, 743
Physicomechanical properties, change in the - of polyethylene on photo-oxidation 2, 257
Physico-mechanical properties, effect of the - of methylmethacrylate, butadiene and styrene copolymers on the impact strength of their compositions with polyvinylchloride 4, 824
Physico-mechanical properties, methods for determining - of individual ultra-thin polymer fibres 8, 2020
Physico-mechanical properties of polymers subjected to the simultaneous action of high pressure and shear deformation 1, 211
Pigmented films, method for the study of kinetics of photopolymerization in the lower layer of - 9, 2287
Plastic flow, the energies and volumes of activation of - of some polymers under high pressure 9, 2160
Plasticizer, effect of polymer structure and the nature and concentration of the - on the formation of defects in plasticized polyvinylchloride and vinylchloride copolymers 4, 816
Plasticizer, study of phase equilibrium by refractometry and the determination of second virial coefficients of polymer– - systems 3, 738
Plasticizers, effect of the thermodynamic affinity of - for polyvinyl chloride of the heat of its interaction with fillers 7, 1557
Plastics, mechanism for rising the impact strength of - 2, 273
Plastigels, viscoelastic properties of plastisols based on the copolymer of methyl methacrylate and methacrylic acid during their transition to - 12, 2947
Plastisols, viscoelastic properties of - based on the copolymer of methyl methacrylate and methacrylic acid during their transition to plastigels 12, 2947
Plasticizers, thermo-optical method of determining temperatures of physical transitions in crystallizing - 11, 2826
Polar media, polymerization of butadiene under the action of sodium organic initiators in slightly - 2, 388
Polar polymers, features of radiation-induced electrical conductivity of some - 7, 1754
Polarized luminescence of polymers with indole-containing luminescent groups 8, 1896
Polarographic analysis of kinetics of synthesis of polyelectrolytes by combination of depolarizer ions with macromolecules 3, 732
Poly(arylate–butadiene) block copolymer, the effect of the composition of - on the temperature-time characteristics of its thermal degradation 5, 1067

Polyamic acid, study of the reaction of - with benzoyl peroxide at room temperature 4, 782
Polyamic acid mixtures, the thermomechanical properties of polyimide compositions produced from - 6, 1375
Polyamic acids, analysis of the thermal cyclization kinetics of solid-state - 5, 1103
Polyamic acids, mass spectrometric thermal analysis of the cyclodehydration of - 12, 2922
Polyacrylamide, complex formation between polymethacrylic acid and - 7, 1683
Polyacrylic acid, IR-spectroscopic study of hydration of the carboxyl-containing celluloses and - 6, 1279
Polyamide, mechanism of reactions initiated by thermal decomposition of benzoyl peroxide in - 12, 2991
Polyamide solutions, structural features of aromatic - in sulphuric acid 6, 1388
Polyamide transformations, formation of nitroxyl radicals during - initiated by peroxides 3, 686
Polyamides, macroscopic stages of peroxide initiator conversions in - 6, 1407
Polyamides, synthesis and study of heterogeneous - containing *m*-carborane 11, 2788
Polyamides, synthesis of - based on activated diesters of pyridinecarboxylic acids 7, 1677
Polyamides, the hydrogen bond and its effect on spontaneous orientation during the heating of aromatic - 5, 1109
Polyamides, the mutual influence of components of a medium on their sorption by - 8, 1960
Polyamides, thermal degradation of compositions based on aromatic - 8, 1953
Polyamidoimide films, ESR analysis of the thermal and thermooxidative degradation of - 2, 393
Polyarylate, the crystallization kinetics of block copolymer mixtures and multiple blocks of polyoxyethylene and - 5, 1116
Poly-(arylate-arylene sulphonoxides), properties of irregular - based on oligoarylene sulphonoxides with various degrees of polymerization 9, 2259
Poly(arylate-arylene sulphonoxides), thermal degradation of - 11, 2654
Polyarylate-sulphone block copolymers, the synthesis and properties of halogen-containing - 12, 2941
Polyarylate methylenes, relation between conditions of synthesis, structure and properties of - 2, 423
Polyarylates, molecular weight studies of - with short branches 1, 142
Polyarylates, on the molecular weight distribution of - 2, 400
Polyarylates, results of study of intermolecular interaction in - 10, 2326
Polyarylene methylenes, polymeric nature of the inhibiting action of - 4, 952
Polyarylene sulphides, influence of the chemical structure of - on properties of the filled polymers 8, 1934
Polyarylene sulphonoxides, ^{1}H and ^{13}C NMR analysis of the synthesis of - based on diphenylolpropane and dichlorodiphenylsulphone 5, 1183
Polyarylene sulphonoxides, study of the synthesis of - based on phenolpthalein and dichlorodiphenylsulphone by ^{13}C NMR 5, 1218
Polybutamid solutions, the properties of - 3, 613
Polycaproamide, equilibrium in the system - –caprolactam–water below the melting point of the polymer 6, 1319
Polycaproamide, polymorphism and structural transformations of - during annealing 1, 49
Polycaproamide, the synthesis of graft copolymers of - with polydimethylaminoethyl methacrylate, using a reversible redox system 11, 2663

Polycaproamide, thermal polymerization of *p*-benzoquinone in the presence of - 3, 641
Polycation structure, on anomalies in the dependence of the electrical conductivity of polymeric ion-radical salts of 7,7,8,8-tetracyanoquinodimethane on aliphatic ionene - 4, 894
Polycondensation, aspects of copolymer synthesis by hetero-phase - 2, 350
Polycondensation, calculation of molecular weight distribution of products of non-equilibrium - , considering the "substitution effect" 10, 2499
Polycondensation, calculation of the gel-point for non-equilibrium - taking into account the "'substitution effect" 10, 2512
Polycondensation, consideration of cyclization in the theory of equilibrium branched - 10, 2477
Polycondensation, elementary stages in - 7, 1643
Polycondensation, functionality of monomers and structure of polymers obtained by - . Review 8, 1783
Polycondensation, reactivity of aromatic oligoamines and oligochlorides on - in aqueous-organic media 3, 673
Polycyclocondensation, investigation of the - of acetyl compounds 2, 293
Polydeuteroethylene, study of mixtures of polyethylene and - by secondary emission mass-spectrometry 2, 487
Polydialkoxyphosphazenes, dielectric relaxation in - 6, 1443
Polydiethylene glycol-sebacates, effect on properties of the molecular structure of - 1, 200
Polydimethylaminoethyl methacrylate, the synthesis of graft copolymers of polycaproamide with - , using a reversible redox system 11, 2663
Polydimethylphenylene oxide, kinetics of the thermal oxidation of - 4, 902
Polydimethylsilazasiloxanes, mechanism of chain propagation and termination in the polymerization-exchange reactions of synthesis of - 8, 2005
Polyelectrolytes, polarographic analysis of kinetics of synthesis of - by combination of depolarizer ions with macromolecules 3, 732
Polyelectrolytes, the synthesis and properties of sulphonapthalene macronetwork - 3, 661
Polyestermaleate, investigation of the effect of ionogenic groups on molecular mobility in - 8, 1859
Polyesters, synthesis and study of - based on asymmetrical diols 6, 1437
Polyether thermoelastoplasts, study of - by the ^{1}H and ^{13}C NMR method 9, 2149
Polyethylene, action of ozone on isotropic and oriented blends of polypropylene and - . On the influence of deformation on the rate of oxidation 11, 2754
Polyethylene, change in the physicomechanical properties of - on photo-oxidation 2, 257
Polyethylene, determination of the molecular weight distribution of high pressure - and calculation of the rate constants of the main chemical reactions 6, 1367
Polyethylene, diffusion, sorption and permeability of binary solvent mixtures in - 8, 1865
Polyethylene, effect of low molecular weight fractions and side branches in the main chain of the macromolecules on the recrystallization process during pressure annealing of - 10, 2385
Polyethylene, features of the kinetics of deformation of oriented - 5, 1212
Polyethylene, radiation-induced graft polymerization of acrylic acid to powdered low-pressure - 8, 2015
Polyethylene, relaxational spectrometry of low density - 9, 2107
Polyethylene, special features of elastic deformatiin of uniaxially oriented high-density - 11, 2760
Polyethylene, study of kinetics of inhibition of thermooxidation of - by carbon black 6, 1462

Polyethylene, study of mixtures of - and polydeuteroethylene by secondary emission mass-spectrometry 2, 487
Polyethylene, study of the structure and molecular mobility of crystalline - by the methods of photo-elasticity and torsion pendulum 7, 1551
Polyethylene, temperature dependence of the properties of composites based on the - and pearlite 1, 171
Polyethylene, the radiation-induced graft polymerization of acryloyl chloride to - and polyethylene terephthalate 2, 406
Polyethylene coatings, contact oxidation and adhesion to steel of - 12, 2840
Polyethylene crystallites, temperature dependence of the distortions in - 1, 33
Polyethyleneimine, complex of Rh(III) and - and their catalytic activity in hydrogenation of cyclohexene 7, 1775
Polyethylene oxalate, calorimetric study of ethylene oxalate, - and parameters of the polymerization of ethylene oxalate in the range 8–450 K 7, 1695
Polyethylene terephthalate, conformation transitions in - on crystallization by the action of a liquid medium 2, 468
Polyethylene terephthalate, the degradation of - in the presence of bacterial infection 7, 1604
Polyethylene terephthalate, the effects of orientation and crystallinity on the resistance of - to photo-oxidation 5, 1138
Polyethylene terephthalate, the electro-conductance of - induced by low-energy electron bombardment 1, 120
Polyethylene terephthalate, the mechanical properties of highly dispersed oriented - 9, 2120
Polyethylene terephthalate, the radiation-induced graft polymerization of acryloyl chloride to polyethylene and - 2, 406
Polyethylene terephthalate films, the transverse straining of orientated "silvery" - 5, 1056
Polyfluoroaromatic compounds, polymerization of - in glow discharge 1, 178
Polyglycidyl methacrylate, interaction of - with carboxylic acids 12, 3030
Polyheteroarylenes, electrophysical properties and molecular mobility of carborane-containing - 10, 2537
Polyheteroarylenes, study of unit heterogeneity of - by NMR spectroscopy. Review 9, 2047
Polyimide compositions, the thermomechanical properties of - produced from polyamic acid mixtures 6, 1375
Poly-bis-isoprene phosphonates, study of optico-mechanical properties of - 12, 3000
Polylactide, thermodynamics of *dl*-lactide, - and polymerization of *dl*-lactide in the range of 0–430 K 7, 1702
Polymer, calculation of M_c from absorption data and concentration dependence of the parameter of - –solvent interaction 4, 1004
Polymer, combination of a gel-chromatograph with an automatic viscometer. Calibration according to molecular weight of the - correcting for instrumental broadening 9, 2295
Polymer, equilibrium in the system polycaproamide–caprolactam–water below the melting point of the - 6, 1319
Polymer, oligomer and - π-arenemetaltricarbonyl complexes 6, 1480
Polymer, phase structure and properties of cured oligomer– - compositions 7, 1655
Polymer, structure of 1-methylcyclooctadiene - as judged by the ^{13}C NMR spectra 4, 775
Polymer, study of phase equilibrium by refractometry and the determination of second virial coefficients of - –plasticizer systems 3, 738
Polymer, the calorimetrric study in the 13·8–340°K range of δ-valerolactone, its - , and of the δ-valerolactone polymerization 3, 628

Polymer chain, concentration dependence of the mean dimensions of the flexible - in semi-dilute solutions as judged by "computer experimental" data 3, 518
Polymer coatings, study of the formation of - by capsulation of solids by radiation-induced polymerization of monomers from the vapour phase 3, 696
Polymer composition, viscoelastic behaviour and relaxation processes in - –water systems 12, 3009
Polymer crystallosolvates. Review 2, 236
Polymer fibres, methods for determining physico-mechanical properties of individual ultra-thin - 8, 2020
Polymer film, a study of the growth in thickness of a - under potentiometric conditions 5, 1060
Polymer films, spectrum of durability times of - 9, 2267
Polymer films, wave-guide method of studying structural layer heterogeneity in - 2, 481
Polymer glasses, the time dependence of the strength of - in a surface active media 7, 1628
Polymer macromolecules, structural transformations in - with mesogenic groups in side chains 4, 922
Polymer materials, testing of organic compounds as stabilizers of - 3, 528
Polymer melt, relationship between the melt index and the value of expansion of a jet of a - flowing out of a hole 6, 1269
Polymer melt mixtures, the thermodynamic and rheological properties of - 3, 607
Polymer melts, potential of the intermolecular interaction and initial viscosity of - in model of overlapping statistical coils 10, 2347
Polymer semi-interpenetrating networks, study of dielectric relaxation in - based on toluylene diisocyanate and propylene sulphide 10, 2369
Polymer science, establishing and developing - 6, 1522
Polymer solutions, computer modelling of the thermodynamic properties of - of varied concentration 12, 2873
Polymer solutions, effect of solvents on dynamic birefringence of - 5, 1258
Polymer solutions, on the use of a real gas model to describe the properties of - in the region of extremely low concentrations 12, 2929
Polymer structure, effect of - and the nature and concentration of the plasticizer on the formation of defects in plasticized polyvinylchloride and vinylchloride copolymers 4, 816
Polymer superconductors, state of research into the production of high-temperature - . Review 2, 229
Polymeric ion-radical salts, on anomalies in the dependence of the electrical conductivity of - of 7,7,8,8-tetracyanoquinodimethane on aliphatic ionene polycation structure 4, 894
Polymeric nature of the inhibiting action of polyarylene methylenes 4, 952
Polymeric networks, birefringence of swollen non-gaussian - 8, 1889
Polymeric networks, effect of cyclization on the topological structure and properties of - based on diglycidyl ethers and aromatic amines 8, 1873
Polymeric rubber based composites, acoustic studies of the structural changes on stretching in highly filled - 7, 1572
Polymeric systems, experimental study of the volume compliance of - in the glassy state 10, 2440
Polymerization, activation energy for radiation - of acrylonitrile adsorbed on silica gel 2, 300
Polymerization, aspects of the cationic - of ε-caprolactone in the presence of alcohols 2, 306
Polymerization, calorimetric study of ethylene oxalate, polyethylene oxalate and parameters of the - of ethylene oxalate in the range 8–450 K 7, 1695

Polymerization, chemical modification and calcium carbonate surface by 4-azo-bis-4-cyanpentanoic acid and its effect on initiation and - 4, 808
Polymerization centres, conversions of the reactive - in glycidyl ether by tertiary amines 2, 335
Polymerization, dilatometers and dilatometric installations for the study of photo-initiated - of liquid compounds based on oligourethane acrylates 10, 2555
Polymerization, distribution of branching centres along macromolecules in branched radical - 2, 445
Polymerization, effect of oxygen on the activity of a supported vanadium catalyst during gas phase - of ethylene 10, 2392
Polymerization, effect of the nature of the initiator on the kinetics of - of vinylchloride at high conversions and on the thermal stability of polyvinylchloride 6, 1360
Polymerization, influence of the structural ordering of liquid oligomers on the kinetics of radiation-induced - 11, 2713
Polymerization, kinetic description of inhibited radical - considering reagent consumption 4, 987
Polymerization, kinetic features of - of 1,1,2,3-tetrachlorobuta-1,3-diene under high pressure 12, 3015
Polymerization, kinetic parameters of inhibited radical - based on the dependence of the initial rate on the concentration of initiator and monomer 4, 877
Polymerization, kinetics of radiation - of allypyridazones 2, 286
Polymerization, kinetics of radiation - of tetrafluoroethylene adsorbed on silica gel at 196°K 2, 279
Polymerization, kinetics of radical - of 1-vinyl-1,2,4-triazole 10, 2529
Polymerization, low temperature radiation - of tetrafluoroethylene in the glassy matrix of perfluoroalkanes 3, 511
Polymerization, main regularities of - of butadiene by the action of a composite sodium–aluminium organic initiator in hydrocarbon medium 7, 1742
Polymerization, mathematical modelling of caprolactam - 5, 1091
Polymerization, molecular weight distribution and distribution of branching centres along macromolecules during radical - of vinyl monomers with the formation of unsaturated end groups 7, 1767
Polymerization of butadiene under the action of sodium organic initiators in slightly polar media 2, 388
Polymerization of hexamethylcyclotrisiloxane by α,ω-bis-(tetramethylammonium) oligodimethylsiloxane in the presence of trimethylsilanol 8, 1998
Polymerization of polyfluoroaromatic compounds in glow discharge 1, 178
Polymerization of vinyl nomomers on the surface of chalk activated by dicarboxyl-containing peroxide 8, 1883
Polymerization of 10-vinylphenanthiazine in presence of organic π-acids 6, 1274
Polymerization, properties of irregular poly-(arylate-arylene sulphonoxides) based on oligoarylene sulphonoxides with various degrees of - 9, 2259
Polymerization, radiation-induced graft - of acrylic acid to powdered low-pressure polyethylene 8, 2015
Polymerization, radiation-induced low-temperature cationic graft - of vinyl-n-butylether to polyvinyl chloride in the glass transition 2, 440
Polymerization, relation between chemical shift values in ^{1}H and ^{13}C NMR spectra of vinyl monomers and some parameters of their reactivity in radical - and copolymerization 9, 2252

Polymerization, relation of auto-acceleration in radical - of methyl methacrylate in bulk with structural changes of the polymerizing system **10,** 2547
Polymerization, study of the effect of tris-(2-carbamoylethyl)amine on the initiation of - of acrylamide by persulphate **7,** 1719
Polymerization, study of the formation of polymer coatings by capsulation of solids by radiation-induced - of monomers from the vapour-phase **3,** 696
Polymerization, the detection and study of the localized (selective) inhibition effect in the radical-initiated three-dimensional - of triethylene glycol dimethacrylate **1,** 149
Polymerization, the - of pentamethyl(ethoxy) cyclotrisiloxane **5,** 1096
Polymerization, the radiation-induced graft - of acryloyl chloride to polyethylene and polyethylene terephthalate **2,** 406
Polymerization, the solid-phase - of cyclopentadiene in the presence of titanium tetrachloride **12,** 2977
Polymerization, the study of kinetic features of the radical - of styrene, initiated by *o,o'*-carbo-tert-butylperoxysuccinyl peroxide **1,** 98
Polymerization, thermal - of *p*-benzoquinone in the presence of polycaproamide **3,** 641
Polymerization, thermal - of styrene and its inhibition. Kinetics and mechanism. Review **7,** 1527
Polymerization, thermodynamics of *dl*-lactide, polylactide and - of *dl*-lactide in the range of 0–430 K **7,** 1702
Polymerization centres, structure of active - of dienes on Ziegler–Natta catalysts **7,** 1542
Polymerization-exchange reactions, mechanism of chain propagation and termination in - of synthesis of polydimethylsilazasiloxanes **8,** 2005
Polymerization mechanism of styrene by the action of tin (IV) chloride in 1,2-dichloroethane **9,** 2272
Polymerization rate, on the influence of secondary low molecular weight products on the - of propylene by the $TiCl_3$-based catalytic system **2,** 412
Polymers, a calorimetric study of changes in crystalline - and their blends under the simultaneous action of high pressures and shear strains **5,** 1073
Polymers, a study of the parameters of the elementary thermodynamic units of macromolecules of heterochain - in melts **11,** 2676
Polymers, an X-ray electron-microscopic study of a number of processes in - **4,** 855
Polymers, application of mathematical simulation for the analysis of molecular weight heterogeneity of - by rapid sedimentation and viscometry **6,** 1518
Polymers, change in the supramolecular structure of epoxide - under the influence of solvents **11,** 2645
Polymers, checking the selectivity of fractionation by distribution between two liquid phases of - capable of forming hydrogen bonds **1,** 185
Polymers, classification of - according to their phase state **8,** 1939
Polymers, coefficients of translational and rotational diffusion of low-molecular compounds in - with various glass transition temperatures **3,** 592
Polymers, determination of the diffusion constants of liquids in - by sorption and by internal reflection spectroscopy **8,** 1853
Polymers, dielectric and nuclear magnetic relaxation in latex - in relation to their morphological peculiarities and mechanical properties **5,** 1159
Polymers, dynamic heat ageing—a rapid method of evaluating the heat stability of - according to the variation of mechanical properties **6,** 1508
Polymers, dynamics of the system of intermolecular hydrogen bonds in strained - **9,** 2134
Polymers, effect of high pressure on certain electrophysical properties of iodine-doped - with a conjugation system **11,** 2641

Polymers, effect of ozone on saturated - . Review 10, 2305
Polymers, effect of the hydrogen bond on the intramolecular organization of - containing cholesterol 5, 1248
Polymers, electro-optical properties of comb-like - with a different distance of the mesogenic side group from the main chain 11, 2606
Polymers, features of radiation-induced electrical condictivity of some polar - 7, 1754
Polymers, functionality of monomers and structure of - obtained by polycondensation. Review 8, 1783
Polymers, influence of the chemical structure of polyarylene sulphides on properties of the filled - 8, 1934
Polymers, intrachain luminescence quenching in solutions of anthracene-containing - based on polymethyl methacrylate 7, 1578
Polymers, intramolecular mobility of - with mesogenic groups in the side chains 7, 1664
Polymers, intramolecular structuring in solutions of comb-like - 1, 1
Polymers, investigation of oxidized - using a positron annihilation technique 12, 2966
Polymers, macromolecular macrocyclic compounds: binding of ions, small molecules and - . Review 5, 1007
Polymers, method of determining hydration number of - in solution 12, 3034
Polymers, method of determining the linear rate of propagation of micro-cracks by plotting distribution curves during deformation of - in liquid media 8, 2040
Polymers, model for volumetric rupture of non-oriented - 3, 533
Polymers, multiplicity of the temperature dependence of the enthalpy of amorphous - in the vicinity of glass transition temperature 12, 2953
Polymers, on the nature of segmental mobility of dense-network epoxy - 11, 2732
Polymers, on the nature of the influence of liquid organic media on the mechanical properties of glassy - 9, 2187
Polymers, orientational strengthening of flexible and rigid - 5, 1151
Polymers, phase diagrams of dioctyl sebaceate mixtures with some - 4, 841
Polymers, physico-mechanical properties of - subjected to the simultaneous action of high pressure and shear deformation 1, 211
Polymers, physiologically active - and macromolecular therapeutic systems 4, 743
Polymers, polarized luminescence of - with indole-containing luminescent groups 8, 1896
Polymers, reasons for lowering of mechanical properties of - during deformation in adsorption-active media 11, 2706
Polymers, regulation of the structure of rigid - in the process of cryolysis 3, 570
Polymers, relation between strength and elastic properties of - 9, 2241
Polymers, relaxation time spectra of - in the range of low deformations 6, 1468
Polymers, relaxational φ-transition in filled - and molecular mobility of active filler particles 9, 2099
Polymers, special aspects of the photochromism of indolinospiropyranes in comb-like - 11, 2635
Polymers, structurization of low molecular weight inorganic compounds introduced into - during their deformation in liquid media 6, 1430
Polymers, study of the kinetics and thermodynamics of thermal breakdown of reticular - of dimethacrylic esters of n-alkylene glycols 10, 2378
Polymers, supermolecular structure of graft copolymers of cotton and cellulose hydrate fibres with certain fluorine-containing - 4, 800
Polymers, "super-slow" rotations of spin probes in solid - 5, 1227
Polymers, synthesis and properties of - of haloidaromatic esters of 2-methyl-1,3-butadienylphosphonic acid 4, 930

Polymers, temperature coefficient of the activation energy of dipole relaxation and heat espansion of - 9, 2277
Polymers, temperature dependence of expansion of crystalline lattices of some flexible chain - 8, 1837
Polymers, the electro-conductance by non-polar - bombarded with low-energy electrons 1, 111
Polymers, the energies and volumes of activation of plastic flow of some - under high pressure 9, 2160
Polymers, the evolution of light absorption induced in - by photo-ageing 4, 832
Polymers, the free induction signal from amorphous parts of partially crystalline - 12, 2971
Polymers, the glass transition process with oriented, flexible - 1, 77
Polymers, the influence of viscosity and dispersion of incompatible - on fibre formation in their blends 7, 1617
Polymers, the molecular weight and volume of spin probes and their effects on their rotation capacity in - 1, 105
Polymers, the phase condition and viscous properties of sulphuric acid solutions of - and copolymers based on *p*-phenylene amides 5, 1085
Polymers, the synthesis, structure and properties of 3,4-dichloro-1,3-butadiene-2-phosphonate - 6, 1414
Polymers, thermal breakdown mechanism of crosslinked - based on diepoxides and aromatic and aliphatic amines 11, 2793
Polymers, using the effect of re-evaporation of metal atoms for the study of surface properties of - 5, 1254
Polymers, visco-elastic properties of linear - and their mixtures with narrow molecular weight distribution 5, 1194
Polymethacrylic acid, complex formation between - and polyacrylamide 7, 1683
Poly-*p*-methacryloyl oxybenzoic ester, hydrodynamic and conformational properties of molecules of the - of *p*-n-nonyloxyphenol 7, 1671
Poly-2-methyl-5-ethylpyridine, the electron spin-lattice relaxation in pyrolyzed - 1, 134
Polymethylmethacrylate, a comparative kinetic description of the photoreduction of ferric chloride and tetraethyl ammonium tetrachloroferrate additives in solid - 2, 378
Polymethylmethacrylate, birefringence of - in a sinusoidal mechanical field 6, 1306
Polymethyl methacrylate, intrachain luminescence quenching in solutions of anthracene-containing polymers based on - 7, 1578
Polymethyl methacrylate, the effect of crosslinkages in - on the parameters and mechanism of diffusional transfer 2, 345
Polymethylmethacrylate, the effect of phosphorus on the high temperature pyrolysis of - 1, 73
Polymethyl methacrylate compositions, features of combustion of - with some phosphoric acid esters 4, 971
Polymethylmethacrylate, possibilities of gel-penetration chromatography as an absolute method of determining the parameters of the molecular weight distribution of - 10, 2400
Poly-4-methylpentene-1, aspects of the oxidation of - 3, 541
Poly-α-methyl styrene solutions, optimization of the turbidimetric precipitation titration of - 12, 3035
Polymorphism and structural transformations of polycaproamide during annealing 1, 49
Poly-N-*n*-octadecylmethacrylamide, dielctric relaxation in - 8, 1902
Polyoctafluoroamyl methacrylate, the study of relaxational properties of molecular networks of - by photoelasticity and torsion pendulum methods 9, 2128

Polyolefines, effect of diffusional and kinetic factors on the post-radiation oxidation of - 12, 2908
Polyolefines, sterically hindered phenols—antioxidants for - . Relation of antioxidative activity to structure. Review 9, 2063
Polyolefines, the influence of liquid plasticizing media on the deformation of crystalline - 8, 1927
Polyols, study of the mechanism of the synergistic action of mixtures of zinc salts of organic acids and - during thermal degradation of polyvinyl chloride 12, 2849
Polyoxyethylene, the crystallization kinetics of block copolymer mixtures and multiple blocks of - and polyarylate 5, 1116
Polyoxyethylene fragments, concerning the degradation of - of oxyethylated compounds during complex-formation with transition metal compounds 6, 1351
Polyoxymethylene, rheological properties of melts of - –atactic polystyrene blends 11, 2614
Polypentenamer, investigation of the mechanism of - degradation in the presence of metathesis catalysts 1, 164
Polyphenylene-1,3,4-oxadiazole, chemical structure of - and fibres based on them 1, 41
Poly-*m*-phenylene isophthalamide, sedimentational-diffusional and viscometric studies on solutions of - and the equilibrium rigidity of its molecules 11, 2689
Polyphenylsiloxane, conformational and optical properties of molecules of ladder type - and its chlorinated derivatives 10, 2405
Polyphosphazenes, some problems in the synthesis of - and possible solutions. Review 11, 2572
Polypropylene, action of ozone on isotropic and oriented blends of - and polyethylene. On the influence of deformation on the rate of oxidation 11, 2754
Polypropylene, diffraction study of the structure of ion exchange fibres from - modified by grafted polystyrene 8, 1797
Polypropylene, disperse structure and mechanical properties of extruded - –polystyrene blends 8, 1825
Polypropylene, inhibiting action of bis-phenols on oxidation of - containing hydroperoxide groups 4, 938
Polypropylene, kinetic characteristics of the inhibiting effect of 4-tert-butyl-2,6-dimercaptophenol on oxidation of - 2, 462
Polypropylene, kinetics and mechanism of decay of peroxide radicals in oxidation of solid - 1, 217
Polypropylene, morphology of extruded - –polystyrene blends 8, 1811
Polypropylene, the decay of peroxide macroradicals in the crystalline phase of isotactic - 6, 1402
Polypropylene and ethylene-propylene rubber, homogenization of blends of - under shear in the presence of inorganic fillers 5, 1081
Polypropylene granules, the morphology of - and its link with the titanium trichloride texture 3, 599
Polypyromellitimide, study of the structure of solutions and gels of - and polyterephthalamide of anilinephthalein in dimethylformamide 6, 1456
Polysiloxane films, study of the structure of thin - prepared in discharge plasma at low temperatures 12, 2864
Polystyrene, diffraction study of the structure of ion exchange fibres from polypropylene modified by grafted - 8, 1797
Polystyrene, disperse structure and mechanical properties of extruded polypropylene– - blends 8, 1825

Polystyrene, low molecular weight products of the breakdown of peroxide radicals in - and polyvinylcyclohexane at room temperature 1, 190
Polystyrene, morphology of extruded polypropylene– - blends 8, 1811
Polystyrene, NMR relaxation and the state of solvent molecules in solutions of polyvinylchloride and - in dibutylphthalate 12, 3024
Polystyrene films, photo-oxidation of 2,6-di-(4′-azidobenzal)cyclohexanone in - 8, 1845
Polyterephthalamide, study of the structure of solutions and gels of polypyromellitimide and - of anilinephthalein in dimethylformamide 6, 1457
Polytetrafluoroethylene films, the features of orientation of macromolecules in - 7, 1611
Polyurethane, sorption and diffusion study of mutually penetrating networks based on - and its ionomer 1, 126
Polyurethanes, a statistical study of the fracture of foamed elastic - under short-term loading 7, 1585
Polyurethanes, study of the shape of decay of NMR free induction in - 8, 1967
Polyurethanes, use of the thermofluctuation concept of strength for evaluating the serviceability of foam - 5, 1042
Polyvinyl acetate, IR spectroscopic study of hydration of cellulose acetate and - 11, 2778
Poly-N-vinylcaprolactam, spin marker investigation of the segmental mobility of poly-N-vinylpyrrolidone and - in solutions 11, 2725
Polyvinyl chloride, deformability of - in creep conditions 6, 1261
Polyvinylchloride, effect of conjugated dienes on crosslinking of - 11, 2808
Polyvinylchloride, effect of polymer structure and the nature and concentration of the plasticizer on the formation of defects in plasticized - and vinylchloride copolymers 4, 816
Polyvinylchloride, effect of the nature of the initiator on the kinetics of polymerization of vinylchloride at high conversions and on the thermal stability of - 6, 1360
Polyvinylchloride, effect of the physico-mechanical properties of methylmethacrylyte, butadiene and styrene copolymers on the impact strength of their compositions with - 4, 824
Polyvinyl chloride, effect of the thermodynamic affinity of plasticizers for - of the heat of its interaction with fillers 7, 1557
Polyvinyl chloride, impulse-NMR study of - –glycerol systems 4, 849
Polyvinylchloride, kinetics of the dehydrochlorination of - in a closed system in the presence of HCl acceptors 9, 2195
Polyvinylchloride, NMR relaxation and the state of solvent molecules in solutions of - and polystyrene in dibutylphthalate 12, 3024
Polyvinyl chloride, phase equilibrium in the - –oligoether acrylate systems 3, 505
Polyvinyl chloride, radiation-induced low-temperature cationic graft polymerization of vinyl-n-butyl ether to - in the glass transition 2, 440
Polyvinyl chloride, stabilization of - by conjugated dienes 4, 854
Polyvinyl chloride, study of the mechanism of the synergistic action of mixtures of zinc salts of organic acids and polyols during thermal degradation of - 12, 2849
Polyvinyl chloride, the stabilization of - by epoxides in the presence of salts of coordinatively unsaturated metals 11, 2671
Poly-4-vinylpyridine, the effect of pH on Cu^{2+} complex formation with - 9, 2143
Polyvinyl chloride, the mechanical behaviour of - and of PVC blended with a rubber modifier over a wide range of deformation rates 10, 2472
Polyvinylcyclohexane, low molecular weight products of the breakdown of peroxide radicals in polystyrene and - at room temperature 1, 190

Poly-N-vinylpyrrolidone, spin marker investigation of the segmental mobility of - and poly-N-vinylcaprolactam in solutions 11, 2725
Polyvinyl trimethyl silane membrane, permeability of glass through an asymmetric - 6, 1500
Porosity, influence of the - of carboxyl cationites of Solose K on the diffusion and kinetics of H_2O sorption 10, 2452
Porous adsorbents, the theory of adsorption and its relation to chromatographic separatian of oligomers on - according to molecular masses and types of functionality 3, 578
Porous reticular copolymers, synthesis of - of divinyl ethers of hydroquinone and diethylene glycol and their testing as sorbents in liquid chromatography 7, 1563
Porous structure, heat of wetting and - of network copolymers 12, 2903
Positron annihilation technique, investigation of oxidized polymers using a - 12, 2966
Post radiation oxidation, effect of diffusional and kinetic factors on the - of polyolefines 12, 2908
Potentiometric conditions, a study of the growth in thickness of a polymer film under - 5, 1060
Powdered low-pressure polyethylene, radiation-induced graft polymerization of acrylic acid to - 8, 2015
Power law for slow physical stress-relaxation in the rubbery condition and its experimental verification 2, 322
Precipitant, hydrodynamic characteristics and light scattering of solutions of a styrene–acrylonitrile copolymers prepared in a - 7, 1734
Pressure, influence of the - of gaseous media on the relaxation properties of elastomers 9, 2210
α-Process, on the relaxation parameters of the - 11, 2737
Propylene, on the influence of secondary low molecular weight products on the polymerization rate of - by the $TiCl_3$-based catalytic system 2, 412
Propylene, rheological properties of ethylene– - copolymers at small shear stresses 6, 1488
Propolyne, study of the alternating copolymerization of isoprene and - using complex compounds of titanium and vanadium as catalysts 10, 2457
Propylene sulphide, study of dielectric relaxation in polymer semi-interpenetrating network based on toluylene diisocyanate and - 10, 2369
Proton-donors, the role of - in cyclotrimerization of isocyanates by the action of an amine-epoxide catalytic system 11, 2768
Propylene oxide, a ^{13}C NMR study of structural isomers and compositional sequences in oligoesters based on - and maleic anhydride 3, 549
Pyridinecarboxylic acids, synthesis of polyamides based on activated diesters of - 7, 1677
Pyrolysis, the effect of phosphorus on the high temperature - of polymethylmethacrylate 1, 73
Pyrolyzed poly-2-methyl-5-ethylpyridine, the electron spin-lattice relaxation in - 1, 134

Radiation-cured oligomer compositions, the action of ultraviolet light on - 3, 556
Radiation-induced electrical conductivity, features of - of some polar polymers 7, 1754
Radiation-induced graft polymerization of acrylic acid to powdered low-pressure polyethylene 8, 2015
Radiation-induced graft polymerization, the - of acryloyl chloride to polyethylene and polyethylene terephthalate 2, 406
Radiation-induced low-temperature cationic graft polymerization of vinyl-n-butyl ether to polyvinyl chloride in the glass transition 2, 440

Radiation-induced polymerization, influence of the structural ordering of liquid oligomers on the kinetics of - 11, 2713
Radiation-induced polymerization, study of the formation of polymer coatings by capsulation of solids by - of monomers from the vapour phase 3, 696
Radiation polymerization, activation energy for - of acrylonitrile adsorbed on silica gel 2, 300
Radiation polymerization, kinetics of - of allylpyridazones 2, 286
Radiation polymerization, kinetics of - of tetrafluoroethylene adsorbed on silica gel at 196°K 2, 279
Radical copolymerization, the - of α-substituted vinyl phosphonates 3, 667
Radical initiation, application of some inhibitors to the study of - 7, 1749
Radical initiators, tetrafluoroethylene telomerization in acetone initiated by ^{60}Co γ-rays and by - . Soluble telomers 2, 330
Radical polymerization, kinetic parameters of inhibited - based on the dependence of the initial rate on the concentration of initiator and monomer 4, 877
Radical polymerization, kinetics of - of 1-vinyl-1,2,4-triazole 10, 2529
Radical polymerization, relation of auto-acceleration in - of methyl methacrylate in bulk with structural changes of the polymerizing system 10, 2547
Radical polymerization and copolymerization, relation between chemical shift values in ^{1}H and ^{13}C NMR spectra of vinyl monomers and some parameters of their reactivity in - 9, 2252
Radicals, kinetic study of solid phase reactions with the participation of - 9, 2173
Reactive polymerization centres, conversions of the - in glycidyl ether by tertiary amines 2, 335
Reactivity of aromatic oligoamines and oligochlorides on polycondensation in aqueous-organic media 3, 673
Reactivity, relative - of organosilicon oligomers with terminal isocyanate groups in reactions with hydroxyl-containing compounds 4, 769
Real gas model, on the use of a - to describe the properties of polymer solutions in the region of extremely low concentrations 12, 2929
Recrystallization phenomena in high molecular weight compounds and their role in dynamics of melting 12, 2915
Recrystallization process, effect of low molecular weight fractions and side branches in the main chain of the macromolecules on the - during pressure annealing of polyethylene 10, 2385
Redox system, the synthesis of graft-copolymers of polycaproamide with polydimethylaminoethyl methacrylate, using a reversible - 11, 2663
Re-evaporation, using the effect of - of metal atoms for the study of surface properties of polymers 5, 1254
Refractometric method of analysis of chemical conversions of macromolecules in solution 11, 2813
Refractometry, study of phase equilibrium by - and the determination of second virial coefficients of polymer–plasticizer systems 3, 738
Relaxation, dielectric and nuclear magnetic - in latex polymers in relation to their morphological peculiarities and mechanical properties 5, 1159
Relaxation, dielectric - in polydialkoxyphosphazenes 6, 1443
Relaxation, dielectric - in poly-N-*n*-octadecylmethacrylamide 8, 1902
Relaxation, kinepectic reinforcement and - of coordination-polymer gels of aluminium soaps 7, 1709
Relaxation, nuclear magnetic - and segmental motion of nitrocellulose in solution 6, 1335

Relaxation, study of dielectric - in polymer semi-interpenetrating networks based on toluylene diisocyanate and propylene sulphide 10, 2369
Relaxation, temperature coefficient of the activation energy of dipole - and heat expansion of polymers 9, 2277
Relaxation, the electron spin-lattice - in pyrolyzed poly-2-methyl-5-ethylpyridine 1, 134
Relaxation parameters, on the - of the α-process 11, 2737
Relaxation processes in crystallizing and non-crystallizing elastomers 1, 67
Relaxation processes, viscoelastic behaviour and - in polymer composition–water systems 12, 3009
Relaxation properties, influence of the pressure of gaseous media on the - of elastomers 9, 2210
Relaxation time spectra of polymers in the range of low deformations 6, 1468
Relaxational properties, the study of - of molecular networks of polyoctafluoroamyl methacrylate by photoelasticity and torsion pendulum methods 9, 2128
Relaxational spectrometry of low density polyethylene 9, 2107
Relaxational φ-transition in filled polymers and molecular mobility of active filler particles 9, 2099
Resins, methods of determining the composition of low-molecular weight epoxide diane - 8, 2034
Rheological properties of ethylene–propylene copolymers at small shear stresses 6, 1488
Rheological properties of melts of polyoxymethylene–atactic polystyrene blends 11, 2614
Rheological properties, the thermodynamic and - of polymer melt mixtures 3, 607
Rigid polymers, regulation of the structure of - in the process of cryolysis 3, 570
Rubber, equilibrium swelling of filled vulcanizates of natural - 2, 455
Rubber, structural heterogenization processes in - –oligomer compositions 9, 2215
Rubbers, study of molecular mobility in filled and unfilled crosslinked organosilicon - 10, 2422
Rubber modifier, the mechanical behaviour of polyvinyl chloride and of PVC blended with a - over a wide range of deformation rates 10, 2472

Salts, the stabilization of polyvinyl chloride by epoxides in the presence of - of coordinatively unsaturated metals 11, 2671
Structural polymers, effect of ozone on - . Review 10, 2305
Second virial coefficients, study of phase equilibrium by refractometry and the determination of - of polymer–plasticizer systems 3, 738
Sedimentation, application of mathematical simulation for the analysis of molecular weight heterogeneity of polymers by rapid - and viscometry 6, 1518
Sedimentational-diffusional and viscometric studies on solutions of poly-*m*-phenylene isophthalamide and the equilibrium rigidity of its molecules 11, 2689
Segmental mobility, on the nature of - of dense-network epoxy polymers 11, 2732
Semi-dilute solution, concentration dependence of the mean dimensions of the flexible polymer chain in - as judged by "computer experimental" data 3, 518
Serum albumin, acylation of - by unsaturated acid chlorides 11, 2668
Shear, homogenization of blends of polypropylene and ethylene-propylene rubber under - in the presence of inorganic fillers 5, 1081
Shear deformation, physico-mechanical properties of polymers subjected to the simultaneous action of high pressure and - 1, 211
Shear strains, a calorimetric study of changes in crystalline polymers and their blends under the simultaneous action of high pressures and - 5, 1073

Shear stresses, rheological properties of ethylene–propylene copolymers at small - 6, 1488
Side branches, effect of low molecular weight fractions and - in the main chain of the macromolecules on the recrystallization process during pressure annealing of polyethylene 10, 2385
Side chains, intramolecular mobility of polymers with mesogenic groups in the - 7, 1664
Silica gel, activation energy for radiation polymerization of acrylonitrile adsorbed on - 2, 300
Silica gel, kinetics of radiation polymerization of tetrafluoroethylene adsorbed on - at 196°K 2, 279
Slowing-down cooperative reactions, the computer simulation of - 3, 620
Sodium organic initiators, polymerization of butadiene under the action of - in slightly polar media 2, 388
Sodium–aluminium organic initiator, main regularities of polymerization of butadiene by the action of a composite - in hydrocarbon medium 7, 1742
Solid-phase polymerization, the - of cyclopentadiene in the presence of titanium tetrachloride 12, 2977
Solid-phase reactions, kinetic study of - with the participation of radicals 9, 2173
Solid polymers, "super-slow" rotations of spin probes in - 5, 1227
Solose K, influence of the porosity of carboxyl cationites of - on the diffusion and kinetics of H_2O sorption 10, 2452
Soluble cellulose acetates, preparations and study of properties of primary low-substituted - 6, 1495
Solutions, intramolecular structuring in - of comb-like polymers 1, 1
Solvent, calculation of M_c from absorption data and concentration dependence of the parameter of polymer–solvent interaction 4, 1004
Solvent, influence of the nature of the - on the processes of structuring in solutions of cellulose acetates 11, 2598
Solvent molecules, NMR relaxation and the state of - in solutions of polyvinylchloride and polystyrene in dibutylphthalate 12, 3024
Solvents' change in the supramolecular structure of epoxide polymers under the influence of - 11, 2646
Solvents, effect of - on dynamic birefringence of polymer solutions 5, 1258
Sorbents, synthesis of porous reticular copolymers of divinyl ethers of hydroquinone and diethylene glycol and their testing as - in liquid chromatography 7, 1563
Sorption and diffusion study of mutually penetrating networks based on polyurethane and its ionomer 1, 126
Sorption, determination of the diffusion constants of liquids in polymers by - and by internal reflection spectroscopy 8, 1853
Sorption, diffusion, - and permeability of binary solvent mixtures in polyethylene 8, 1865
Sorption, influence of the porosity of carboxyl carbonites of Solose K on the diffusion and kinetics of H_2O - 10, 2452
Sorption, the mutual influence of components of a medium on their - by polyamides 8, 1960
Sorption properties, structure and - of macroporous KM-2p carboxyl cation-exchange resin 5, 1205
Spectrometry, relaxational - of low density polyethylene 9, 2107
Spectrophotometric titration in the IR region of 2-methyl-5-vinyl pyridine–acrylic acid copolymers 1, 205
Spectroscopic study, a - of the thermo-oxidative degradation of copolymers of acrylonitrile with N-methylolacrylamide 7, 1597

Spectroscopy, determination of the diffusion constants of liquids in polymers by sorption and by internal reflection - 8, 1853
Spin marker investigation of the segmental mobility of poly-N-vinylpyrrolidone and poly-N-vinylcaprolactam in solutions 11, 2725
Spin probes, "super-slow" rotations of - in solid polymers 5, 1227
Spin probes, the molecular weight and volume of - and their effects on their rotation capacity in polymers 1, 105
Stabilization, the - of polyvinyl chloride by epoxides in the presence of salts of coordinately unsaturated metals 11, 2671
Stabilizers, testing of organic compounds as - of polymer materials 3, 528
Steel, contact oxidation and adhesion to - of polyethylene coatings 12, 2840
Strained polymers, dynamics of the system of intermolecular hydrogen bonds in - 9, 2134
Strength and elastic properties, relaxation between - of polymers 9, 2241
Strength of plastics, mechanism for rising the impact - 2, 273
Stretching, acoustic studies of the structural changes on - in highly filled polymeric rubber based composites 7, 1572
Stretching, determination of the degree of crystallinity of elastomers under - 1, 59
Stretching, features of strain-strength properties of butadiene–styrene block copolymers under uniaxial - 1, 90
Stretching, features of the development of forced elastic deformation during the - of glasslike polyethyleneterephthalate in an adsorption-active medium 10, 2464
Strcutural changes, relation of auto-acceleration in radical polymerization of methyl methacrylate in bulk with - of the polymerizing system 10, 2547
Structural layer heterogeneity, wave-guide method of studying - in polymer films 2, 481
Structural ordering, influence of the - of liquid oligomers on the kinetics of radiation-indiced polymerization 11, 2713
Structural transformations in polymer macromolecules with mesogenic groups in side chains 4, 922
Structural transformations, polymorphism and - of polycaproamide during annealing 1, 49
Structure, microscope study of the - and decomposition of fluoroplast films produced from powder by caking and condensation under vacuum 4, 861
Structure, study of the - and deformation properties of films from compositions of a fluoropolymer and copolymer of 2,5-methylvinylpyridine and divinylbenzene 4, 915
Structure, study of the - of solutions and gels of polypyromellitimide and polyterephthalamide of anilinephthalein in dimethylformamide 6, 1456
Structure, the synthesis, - and properties of 3,4-dichloro-1,3-butadiene-2-phosphonate polymers 6, 1414
Structure and sorption properties of macroporous KM-2p carboxyl cation-exchange resin 5, 1205
Structuring, influence of the nature of the solvent on the processes of - in solutions of cellulose acetates 11, 2598
Structurization of low molecular weight inorganic compounds introduced into polymers during their deformation in liquid media 6, 1430
Styrene, effect of the physico-mechanical properties of methylmethacrylate, butadiene and - copolymers on the impact strength of their compositions with polyvinylchloride 4, 824
Styrene, features of strain-strength properties of butadiene– - block copolymers under uniaxial stretching 1, 90
Styrene, gradient adsorption thin layer chromatography of statistical - –acrylonitrile copolymers 4, 909

Styrene, hydrodynamic characteristics and light scattering of solutions of a - -acrylonitrile copolymer prepared in a precipitant 7, 1734
Styrene, polymerization mechanism of - by the action of tin (IV) chloride in 1,2-dichloroethane 9, 2272
Styrene, the study of kinetic features of the radical polymerization of - , initiated by *o,o'*carbo-tert-butylperoxysuccinyl peroxide 1, 98
Styrene, thermal polymerization of - and its inhibition. Kinetics and mechanism. Review 7, 1527
"Substitution effect", calculation of molecular weight distribution of products of non-equilibrium polycondensation, considering the - 10, 2499
"Substitution effect", calculation of the gel-point for non-equilibrium polycondensation taking into account the - 10, 2512
Substitution reactions in ternary systems of macromolecules 2, 367
Sulphonaphthalene, the synthesis and properties of - macronetwork polyelectrolytes 3, 661
Sulphuric acid, structural features of aromatic polyamide solutions in - 6, 1388
Sulphuric acid solutions, the phase condition and viscous properties of - of polymers and copolymers based on *p*-phenylene amides 5, 1085
Superconductors, state of research into the production of high-temperature polymer - . Review 2, 229
Supermolecular structure of graft copolymers of cotton and cellulose hydrate fibres with certain fluorine-containing polymers 4, 800
Supramolecular structure, change in the - of epoxide polymers under the influence of solvents 11, 2646
Synergistic action, study of the mechanism of the - of mixtures of zinc salts of organic acids and polyols during thermal degradation of polyvinyl chloride 12, 2849
Synthesis and properties of polymers of haloidaromatic esters of 2-methyl-1,3-butadienylphosphonic acid 4, 930
Synthesis and study of heterogeneous polyamides containing *m*-carborane 11, 2788
Synthesis, aspects of copolymer - by hetero-phase polycondensation 2, 350
Synthesis, ^{1}H and ^{13}C NMR analysis of the - of polyarylene sulphonoxides based on diphenylolpropane and dichlorodiphenylsulphone 5, 1183
Synthesis, infrared analysis of the conditions of - of alkyl alumoxane complex catalysts influencing their activity in the copolymerization of epoxides 7, 1688
Synthesis, matrix - of copolymer chains with definite alternation of monomer units 8, 1909
Synthesis, mechanism of chain propagation and termination in the polymerization-exchange reactions of - of polydimethylsilazasiloxanes 8, 2005
Synthesis of polyamides based on activated diesters of pyridinecarboxylic acids 7, 1677
Synthesis of porous reticular copolymers of divinyl ethers of hydroquinone and diethylene glycol and their testing as sorbents in liquid chromatography 7, 1563
Synthesis, polarographic analysis of kinetics of - of polyelectrolytes by combination of depolarizer ions with macromolecules 3, 732
Synthesis, relation between conditions of - , structure and properties of polyarylate methylenes 2, 423
Synthesis, some problems in the - of polyphosphazenes and possible solutions. Review 11, 2572
Synthesis, study of the heterogeneous reaction of formation of primary products of addition in the - of phenol-formaldehyde and naphthalene-phenol-formaldehyde oligomers 6, 1421
Synthesis, study of the - of polyarylene sulphonoxides based on phenolphthalein and dichlorodiphenylsulphone by ^{13}C NMR 5, 1218

Synthesis, the - and properties of aliphatic-aromatic block copolymers 1, 158
Synthesis, the - and properties of halogen-containing polyarylate-sulphone block copolymers 12, 2941
Synthesis, the - and properties of sulphonaphthalene macronetwork polyelectrolytes , 3, 661
Synthesis, the - and study of acid polyamides based on bis-*ortho*-amino acids and tetracarboxylic anhydrides 1, 85
Synthesis, the - of graft copolymers of polycaproamide with polydimethylaminoethyl methacrylate, using a reversible redox system 11, 2663
Synthesis, the - structure and properties of 3,4-dichloro-1,3-butadiene-2-phosphonate polymers 6, 1414

Telomerization, tetrafluoroethylene - in acetone initiated by ^{60}Co γ-rays and by radical initiators. Soluble telomers 2, 330
Telomers, study of the reactions of formation and destruction of condensation - of bisecondary aromatic glycols and carboxylic acids 12, 2831
Temperature coefficient of the activation energy of dipole relaxation and heat expansion of polymers 9, 2277
Temperature dependence of the distortions in polyethylene crystallites 1, 33
Temperature dependence of the properties of composites based on the polyethylene and pearlite 1, 171
Temperature-time characteristics, the effect of the composition of poly(arylate–butadiene) block copolymer on the - of its thermal degradation 5, 1067
Termination, mechanism of chain propagation and - in polymerization-exchange reactions of synthesis of polydimethylsilazasiloxanes 8, 2005
4-Tert-butyl-2,6-dimercaptophenol, kinetic characteristics of the inhibiting effect of - on oxidation of polypropylene 2, 462
Tetracarboxylic anhydrides, the synthesis and study of acid polyamides based on bis-*ortho*-amino acids and - 1, 85
1,1,2,3-Tetrachlorobuta-1,3-diene, kinetic features of polymerization of - under high pressure 12, 3015
7,7,8,8-Tetracyanoquinodimethane, on anomalies in the dependence of the electrical conductivity of polymeric ion-radical salts of - on aliphatic ionene polycation structure 4, 894
Tetraethyl ammonium tetrachloroferrate, a comparative kinetic description of the photoreduction of ferric chloride and - additives in solid polymethylmethacrylate 2, 378
Tetrafluoroethylene, kinetics of radiation polymerization of - adsorbed on silica gel at 196°K 2, 279
Tetrafluoroethylene, low temperature radiation polymerization of - in the glassy matrix of perfluoroalkanes 3, 511
Tetrafluoroethylene telomerization in acetone initiated by ^{60} Co γ-rays and by radical initiators. Soluble telomers 2, 330
Thermal analysis, mass spectrometric - of the cyclodehydration of polyamic acids 12, 2922
Thermal and thermooxidative degradation, ESR analysis of the - of polyamidoimide films 2, 393
Thermal breakdown, study of the kinetics and thermodynamics of - of reticular polymers of dimethacrylic esters of n-alkylene glycols 10, 2378

Thermal breakdown mechanism of crosslinked polymers based on diepoxides and aromatic and aliphatic amines 11, 2793
Thermal cyclization kinetics, analysis of the - of solid-state polyamic acids 5, 1103
Thermal decomposition, mechanism of reactions initiated by - of benzoyl peroxide in polyamide 12, 2991
Thermal degradation, effect of adjacent units during - of copolymers of vinyl chloride with vinyl acetate 6, 1299
Thermal degradation of compositions based on aromatic polyamides 8, 1953
Thermal degradation of poly(arylate-arylene sulphonoxides) 11, 2654
Thermal degradation, study of the mechanism of the synergistic action of mixtures of zinc salts of organic acids and polyols during - of polyvinyl chloride 12, 2849
Thermal degradation, the effect of the composition of poly(arylate–butadiene) block copolymer on the temperature-time characteristics of its - 5, 1067
Thermal degradation, the mechanism of - of low molecular weight compounds modelling the structure of network polymers based on diepoxides and aromatic and aliphatic amines 3, 647
Thermal oxidation, kinetics of the - of polydimethylphenylene oxide 4, 902
Thermal polymerization of *p*-benzoquinone in the presence of polycaproamide 3, 641
Thermal polymerization of styrene and its inhibition. Kinetics and mechanism. Review 7, 1527
Thermal stability, effect of the nature of the initiator on the kinetics of polymerization of vinylchloride at high conversions and on the - of polyvinylchloride 6, 1360
Thermodynamic and rheological properties, the - of polymer melt mixtures 3, 607
Thermodynamic affinity, effect of the - of plasticizers for polyvinyl chloride of the heat of its interaction with fillers 7, 1557
Thermodynamic properties, computer modelling of the - of polymer solutions of varied concentration 12, 2873
Thermodynamics of *dl*-lactide, polylactide and polymerization of *dl*-lactide in the range of 0–430 K 7, 1702
Thermodynamics of the compatibility of blocks in block copolymers 10, 2331
Thermodynamics of the formation of scondary nuclei 12, 2888
Thermodynamics, study of the kinetics and - of thermal breakdown of reticular polymers of dimethacrylic esters of n-alkylene glycols 10, 2378
Thermofluctuation, use of the - concept of strength for evaluating the serviceability of foam polyurethanes 5, 1042
Thermomechanical properties, the - of polyimide compositions produced from polyamic acid mixtures 6, 1375
Thermo-optical method of determining temperature of physical transitions in crystallizing plasticizers 11, 2826
Thermo-oxidation, study of kinetics of inhibition of - of polyethylene by carbon black 6, 1462
Thermo-oxidaive degradation, a spectroscopic study of the - of copolymers of acrylonitrile with N-methylolacryiamide 7, 1597
Thermooxidative degradation, ESR analysis of the thermal and - of polyamidoimide films 2, 393
Thin-layer chromatography, determining the properties of mono-functional components in oligoesters by - 9, 2290
Thin layer chromatography, gradient adsorption - of statistical styrene–acrylonitrile copolymers 4, 909
Thiokol, effect of mineral salts on the structure of liquid - 5, 1243

Time dependence, the - of the strength of polymer glasses in a surface active media 7, 1628
Tin (IV) chloride, polymerization mechanism of styrene by the action of - in 1,2-dichloroethane 9, 2272
Titanium, study of the alternating copolymerization of isoprene and propylene using complex compounds of - and vanadium catalysts 10, 2457
Titanium tetrachloride, the solid-phase polymerization of cyclopentadiene in the presence of - 12, 2977
Titanium trichloride, the morphology of polypropylene granules and its link with the - texture 3, 599
2,4-Toluylene diisocyanate, co-cyclotrimerization of - and phenyl isocyanate 11, 2700
Toluylene diisocyanate, study of dielectric relaxation in polymer semi-interpenetrating networks based on - and propylene sulphide 10, 2369
Topological structure, effect of cyclization on the - and properties of polymeric networks based on diglycidyl ethers and aromatic amines 8, 1873
Torsion pendulum, study of the structure and molecular mobility of crystalline polyethylene by the methods of photo-elasticity and - 7, 1551
Torsion pendulum methods, the study of relaxational properties of molecular networks of polyoctafluoroamyl methacrylate by photoelasticity and - 9, 2128
Trans-**polypiperylene,** properties of - in solutions 5, 1237
φ-**Transition,** relaxational - in filled polymers and molecular mobility of active filler particles 9, 2099
Transverse straining, the - of orientated "silvery" polyethylene terephthalate films 5, 1056
Triacetylcellulose, nature of the breakdown of mechanically loaded - initiated by benzoyl peroxide 5, 1176
Trialkyl boron + tert-butylperoxytrimethyl silicon system, study of the initiating capacity of the - in presence of vinyl monomers by the ESR method 3, 493
Triethylene glycol dimethacrylate, the detection and study of the localized (selective) inhibition effect in the radical-initiated three-dimensional polymerization of - 1, 149
Trimethylsilanol, polymerization of hexamethylcyclotrisiloxane by α,ω-bis-(tetramethylammonium) oligodimethylsiloxane in the presence of - 8, 1998
1,3,5-Trimethyl-1,3,5-triphenyl cyclotrisiloxane, anionic non-equilibrium copolymerization of hexamethyl cyclotrisiloxane with *cis* and *trans*-isomers of - 1, 27
Tris-(2-carbamoylethyl)amine, study of the effect of - on the initiation of polymerization of acrylamide by persulphate 7, 1719
Turbidimetric precipitation titration, optimization of the - of poly-α-methyl styrene solutions 12, 3035

Ultra-thin polymer fibres, methods for determining physicomechanical properties of individual - 8, 2020
Ultraviolet light, the action of - on radiation-cured oligomer compositions 3, 556
Uniaxially oriented high-density polyethylene, special features of elastic deformation of - 11, 2760
Unsaturated end groups, molecular weight distribution and distribution of branching centres along macromolecules during radical polymerization of vinyl monomers with the formation of - 7, 1767
Unsaturated metals, the stabilization of polyvinyl chloride by epoxides in the presence of salts of coordinatively - 11, 2671
Urea-acrylates, structure of oligourethane - 12, 2882

Urea-formaldehyde oligomers, infrared investigation of the structure of - synthesized in the presence of amines 8, 1974
Urethane rubbers, NMR analysis of the crystallization of oligoesters and - 5, 1170

δ-Valerolactone polymerization, the calorimetric study in the 13·8–340°K range of δ-valerolactone, its polymer, and of the - 3, 628
Vanadium catalyst, effect of oxygen on the activity of a supported - during gas phase polymerization of ethylene 10, 2392
Vanadium, study of the alternating copolymerization of isoprene and propylene using complex compounds of titanium and - as catalysts 10, 2457
Vapour-phase, study of the formation of polymer coatings by capsulation of solids by radiation-induced polymerization of monomers from the - 3, 696
Vinyl acetate, effect of adjacent units during thermal degradation of copolymers of vinyl chloride with - 6, 1299
Vinyl-n-butyl ether, radiation-induced low-temperature cationic graft polymerization of - to polyvinyl chloride in the glass transition 2, 440
Vinyl chloride, effect of adjacent units during thermal degradation of copolymers of - with vinyl acetate 6, 1299
Vinyl chloride, effect of polymer structure and the nature and concentration of the plasticizer on the formation of defects in plasticized polyvinylchloride and - copolymers 4, 816
Vinylchloride, effect of the nature of the initiator on the kinetics of polymerization of - at high conversions and on the thermal stability of polyvinylchloride 6, 1360
Vinyl chloride homo- and copolymers, analysis of the content and distribution of the double bonds for - with a different molecular mass distribution 5, 1047
Vinyl monomers, copolymerization of 3,4-epoxyhexahydrobenzyl acrylate with - 4, 867
Vinyl monomers, molecular weight distribution and distribution of branching centres alog macromolcules during radical polymerizatin of - with the formation of unsaturated end groups 7, 1767
Vinyl monomers, polymerization of - on the surface of chalk activated by dicarboxyl-containing peroxide 8, 1883
Vinyl monomers, relation between chemical shift values in ^{1}H and ^{13}C NMR spectra of - and some parameters of their reactivity in radical polymerization and copolymerization 9, 2252
Vinyl monomers, study of the initiating capacity of the trialkyl boron + tert-butylperoxytrimethyl silicon system in the presence of - by the ESR method 3, 493
10-Vinylphenanthiazine, polymerization of - in presence of organic π-acids 6, 1274
Vinyl phosphonates, the radical copolymerization of α-substituted - 3, 667
1-Vinyl-1,2,4-triazole, kinetics of radical polymerization of - 10, 2529
Viscoelastic behaviour and relaxation processes in polymer composition–water systems 12, 3009
Visco-elastic properties of linear polymers and their mixtures with narrow molecular weight distribution 5, 1194
Viscoelastic properties of plastisols based on the copolymer of methyl methacrylate and methacrylic acid during their transition to plastigels 12, 2947
Viscometer, combination of a gel-chromatograph with an automatic - . Calibration according to molecular weight of the polymer correcting for instrumental broadening 9, 2295

Viscometric studies, sedimentational-diffusional and - on solutions of poly-*m*-phenylene isophthalamide and the equilibrium rigidity of its molecules 11, 2689
Viscometry, application of mathematical simulation for the analysis of molecular weight heterogeneity of polymers by rapid sedimentation and - 6, 1518
Viscosities, intrinsic - of diethylene glycol adipate solutions of various functionalities 5, 1144
Viscosity, potential of the intermolecular interaction and initial - of polymer melts in model of overlapping statistical coils 10, 2347
Viscosity, the influence of - and dispersion of incompatible polymers on fibre formation in their blends 7, 1617
Viscous properties, the phase condition and - of sulphuric acid solutions of polymers and copolymers based on *p*-phenylene amides 5, 1085
Volumetric rupture, model for - of non-oriented polymers 3, 533
Vulcanizates, equilibrium swelling of filled - of natural rubber 2, 455

Water, distribution of electrolytes and phase equilibria in a cellulose ether- - -electrolyte system 3, 704
Water, equilibrium in the system polycaproamide-caprolactam- - below the melting point of the polymer 6, 1319
Water, viscoelastic behaviour and relaxation processes in polymer composition- - systems 12, 3009
Wave-guide method of studying structural layer heterogeneity in polymer films 2, 481
Wetting, anisotropy of - and the molecular orientation capacity of elastomers under deformation 8, 1944

X-ray electron-microscopic study, an - of a number of processes in polymers 4, 855

Ziegler–Natta catalysts, structure of active polymerization centres of dienes on - 7, 1542
Ziegler–Natta catalysts, study of the interaction of components of heterogeneneous - , using the Monte Carlo method 12, 2985
Zinc salts, study of the mechanism of the synergistic action of mixtures of - of organic acids and polyols during thermal degradation of polyvinyl chloride 12, 2849
